CHARACTER INDUSTRY WHITE PAPER

SUMMARY

PART 1. Usage Status

1. Survey Design

The subjects of this survey are people aged 3 to 69 living nationwide who have used character content (character merchandise, character-printed merchandise, digital character merchandise) “at least once every 2-3 months” in the past year. Those aged 10-69 and 3-9 were surveyed separately.

Parents were asked to respond on behalf of their children aged 3-9 and 10-13, and children who used character content “at least once every 2-3 months” were included in the survey.

The sampling frame for the survey was set at 1.75 million panelists held by the agency conducting the survey (Embrain Research Co., Ltd.). As of April 2024, the Ministry of the Interior and Safety’s resident registration population statistics were distributed proportionally by region, gender, and age, and questionnaires were sent to the survey panelists through various methods such as email, social media, and KakaoTalk notifications to secure the target sample based on whether or not they used character content.

The survey cycle is once a year, and the response criteria for the content usage survey are from June 2023 to May 2024 (the most recent year) unless otherwise stated.

Data were collected via an online survey during May and June 2024 (May 20, 2024 - June 20, 2024).

Table 1 **Online Questionnaire Survey Design on Character Users (Age 10-69)**

Division	Content
Target Population	• All citizens aged from 10 to 69
Survey Population	• Those who have used character content (character merchandise, character-printed merchandise, digital character merchandise) “at least once in 2-3 months” in the past year
Survey Area	• Nationwide
Data Collecting Method	• Online survey using structured questionnaires
Sampling Frame	• Resident registration demographic status provided by the Ministry of Interior and Safety as of April 2024 • Used the 1.75 million people from the nationwide survey panel held by the survey agency as a sampling frame
Sampling Method	• Proportionally allocated by gender/age/region
Sampling Error	• ±1.7%p at 95% confidence level
Valid Sample	• 3,500
Data Collecting Period	• May – June, 2024 (May 20, 2024-June 20, 2024)
Survey Host	• Korea Creative Content Agency
Survey Agency	• Embrain Research Co., Ltd.

Table 2 **Online Questionnaire Survey Design on Character Users (Age 3-9)**

Division	Content
Target Population	• All citizens aged from 3-9
Survey Population	• Those who have used character content (character merchandise, character-printed merchandise, digital character merchandise) “at least once in 2-3 months” in the past year
Survey Area	• Nationwide
Data Collecting Method	• Online survey using structured questionnaires
Sampling Frame	• Resident registration demographic status provided by the Ministry of Interior and Safety as of April 2024 • Used the 1.75 million people from the nationwide survey panel held by the survey agency as a sampling frame
Sampling Method	• Proportionally allocated by gender/age/region
Sampling Error	• ±6.2%p at 95% confidence level
Valid Sample	• 250
Data Collecting Period	• May – June, 2024 (May 20, 2024-June 20, 2024)
Survey Host	• Korea Creative Content Agency
Survey Agency	• Embrain Research Co., Ltd.

2. Main Survey Results (Age 10-69)

2-1. Frequency of Character Use (Age 10-69)

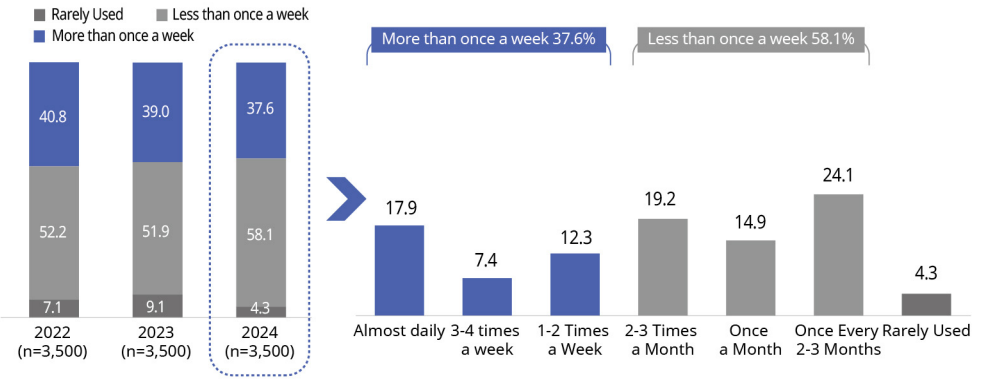

(1) Frequency of Character Merchandise Use

The frequency of character merchandise use was 37.6% for “more than once a week” and 58.1% for “less than once a week,” and among them, “once every 2-3 months” was the highest at 24.1%.

When looking at the characteristics of respondents, the use of was relatively high among women and those in their 30s or younger.

Figure 1 Frequency of Using Character Merchandise

(Base: Total, Unit: %)

(2) Frequency of Character-printed Merchandise Use

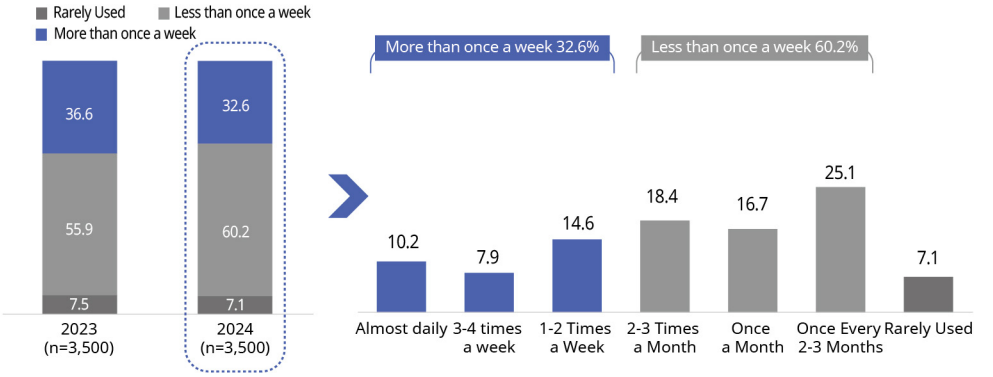

The frequency of using character-printed merchandise s was 32.6% for “more than once a week” and 60.2% for “less than once a week,” and among them, “once every 2-3 months” was the highest at 25.1%.

Looking at the characteristics of respondents, the use of “more than once

a week" was relatively high among women and those in their 30s.

Figure 2 Frequency of Character-printed Merchandise Use

(Base: Total, Unit: %)

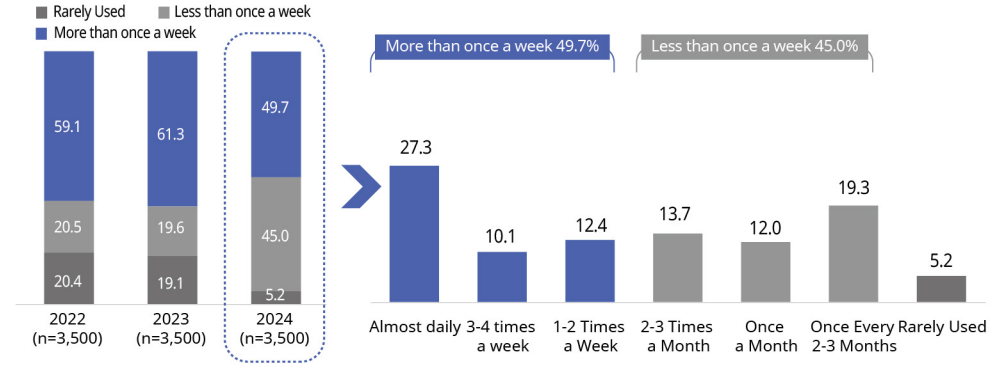

(3) Frequency of Digital Character Merchandise Use

The frequency of using digital character merchandise was 49.7% for "more than once a week" and 45.0% for "less than once a week," with "almost daily" being the highest at 27.3%.

Looking at the characteristics of respondents, "more than once a week" was relatively high among women and those in their 30s.

Figure 3 Frequency of Digital Character Merchandise Use

(Base: Total, Unit: %)

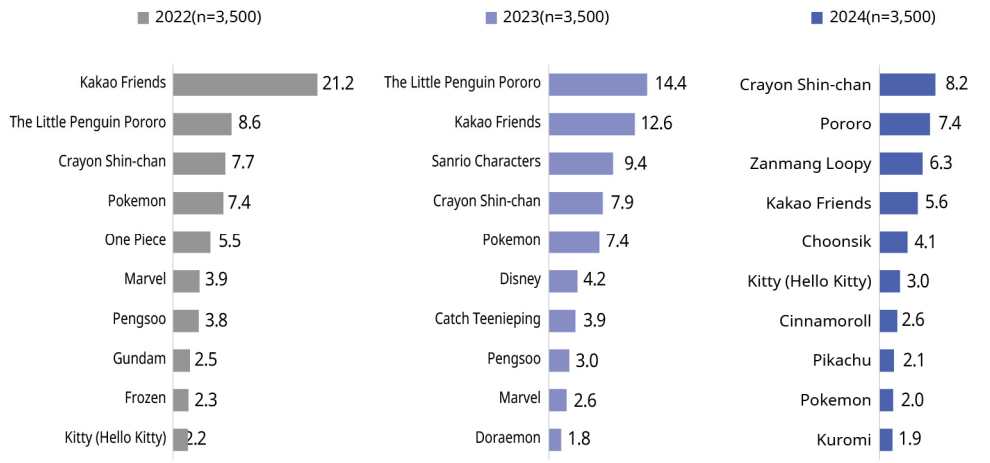

2-2. Most Favored Character

The most popular characters were <Crayon Shin-chan> (8.2%) and <Pororo> (7.4%), followed by <Zanmang Loopy> (6.3%), <Kakao Friends> (5.6%), and <Choonsik> (4.1%).

Looking at the characteristics of respondents, <Crayon Shin-chan> ranked first among those in their 30s and younger, <Pororo> ranked first among those in their 40s and 60s, and <Kakao Friends> ranked first among those in their 50s.

Figure 4 **Most Favored Character**

(Base: Total, Unit: %)

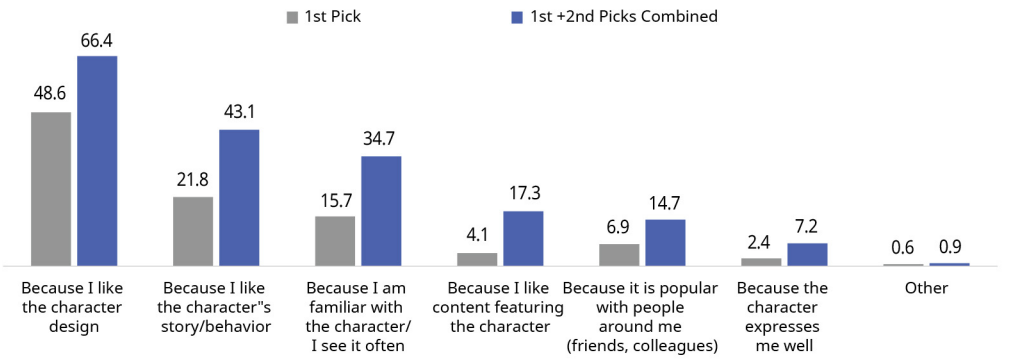

2-3. Reason for the Most Favored Character

The reason for the most preferred character was “because I like the character’s design” with 66.4% of respondents, followed by “because I like the character's story/behavior” (43.1%) and “because I am familiar with the character/I see it often” (34.7%) (based on 1st and 2nd picks combined).

Looking at the characteristics of the respondents, “because I like the character design” was relatively higher among women and younger people, "because I like the character's story/behavior" was relatively higher among teenagers, and “because I am familiar with the character/I see it often” was relatively higher among men.

Figure 5 Reason for the Most Favored Character

(Base: Total, Unit: %)

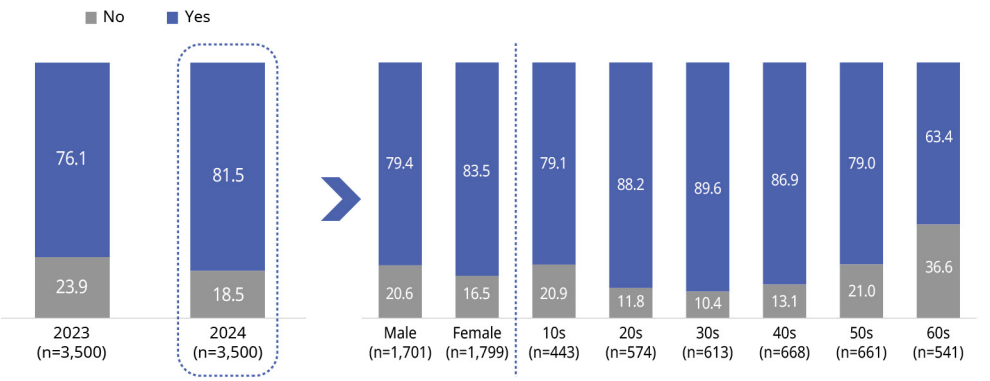

2-4. Experience of Purchasing Character Merchandise

81.5% of respondents answered that they had the “experience of purchasing character merchandise” in the past year.

Looking at the characteristics of respondents, the experience of purchasing character merchandise was relatively higher among women and those in their 20s to 40s.

Figure 6 Experience of Purchasing Character Merchandise

(Base: Total, Unit: %)

2-5. Type of Character Merchandise Purchased

The most purchased type of character merchandise was “dolls” at 64.9%.

The next most purchased items were “figures/plastic models” (43.2%), “DIY/hobby toys” (38.5%), and “infant/toddler toys” (22.7%).

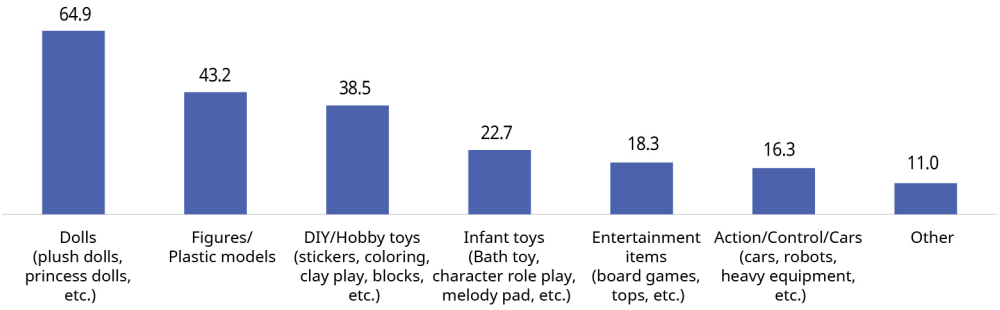

Looking at the characteristics of respondents, women had a relatively high purchase rate of “dolls” and “DIY/hobby toys,” while men had a relatively high purchase rate of “figures,” “entertainment items,” and “action/control/cars.”

By age, the purchase rate of “infant/toddler toys” was relatively higher in

those in their 30s, 40s, and 60s.

Figure 7 Type of Character Merchandise Purchased

(Base: People with Experience of Purchasing Character Merchandise (n=2,852), Duplicate Responses, Unit: %)

2-6. Main Considerations When Purchasing Character Merchandise

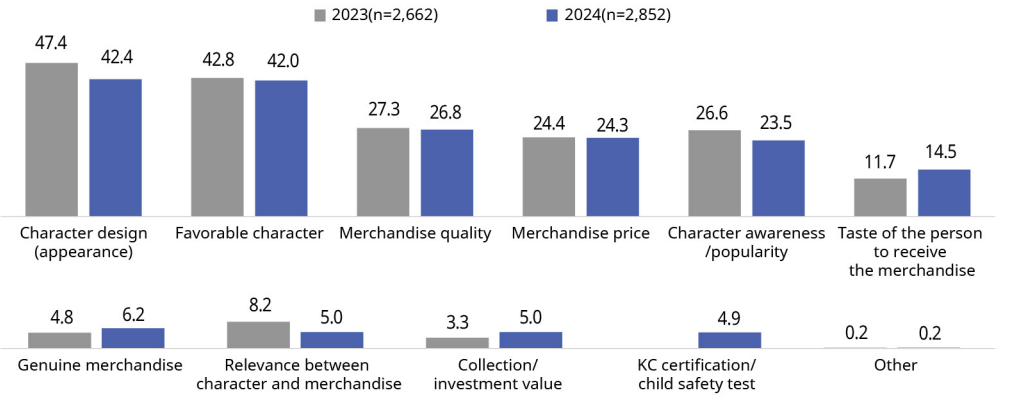

The responses that the main considerations when purchasing character merchandise were “character design (appearance)” (42.4%) and “favorable character” (42.0%) were similarly high, followed by “merchandise quality” (26.8%), “merchandise price” (24.3%), and “character awareness/popularity” (23.5%) (based on 1st and 2nd picks combined).

Looking at the characteristics of respondents, the proportion of women who considered “character design (appearance)” was relatively high, while the proportion of men who considered "favorable character" was relatively high.

By age, the proportion of those in their teens who considered “favorable character” was relatively high, while the proportion of those in their 20s who considered “character design (appearance)” was relatively high.

Figure 8 Main Considerations when Purchasing Character Merchandise

(Base: People with Experience of Purchasing Character Merchandise, Unit: %, (Based on 1st +2nd picks combined))

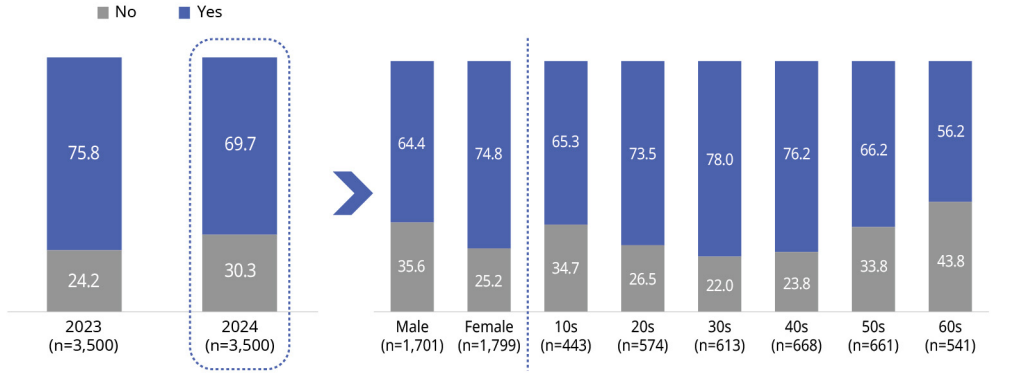

2-7. Experience of Purchasing Character-printed Merchandise

69.7% of respondents answered “yes” when asked they had the experience of purchasing character-printed merchandise in the past year.

Looking at the characteristics of respondents, purchasing experience was relatively high among women and those in their 20s and 40s.

Figure 9 Experience of Purchasing Character-printed Merchandise

(Base: Total, Unit: %)

2-8. Type of Character-printed Merchandise Purchased

The type of character-printed merchandise purchased was “stationery/fancy” at 56.8%, the highest.

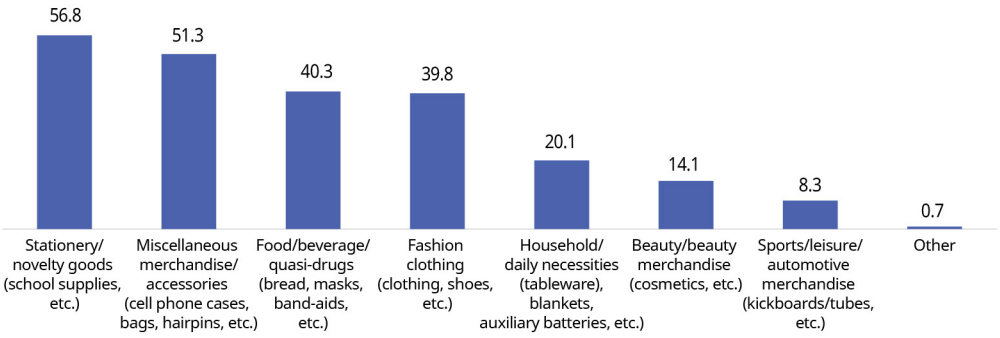

Next were “miscellaneous merchandise/accessories” (51.3%), “food/beverage/ quasi-drugs” (40.3%), and “fashion clothing” (39.8%).

Looking at the characteristics of respondents, women had a relatively high purchase rate for "stationery/novelty goods,” “miscellaneous merchandise/ accessories,” “food/beverage/quasi-drugs,” and “beauty/beauty merchandise,” while men had a relatively high purchase rate for “sports/ leisure/automotive merchandise.”

By age, the purchase rate for “stationery/fancy” was relatively high for those in their teens and 40s, and for those in their 20s, the purchase rate for “miscellaneous merchandise/accessories” was relatively high.

Figure 10 Type of Character-printed Merchandise Purchased

(Base: People with Experience of Purchasing Character-printed Merchandise (n=2,440), Duplicate Responses, Unit: %)

2-9. Main Considerations when Purchasing Character-printed Merchandise

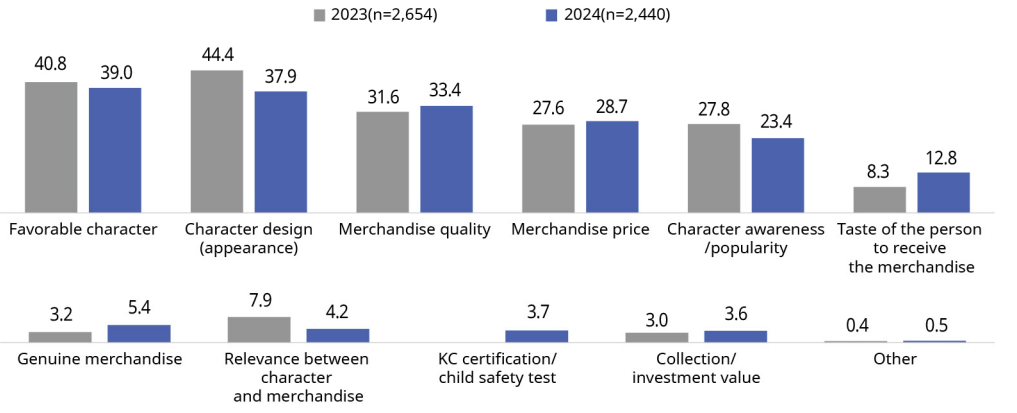

The responses that the main considerations when purchasing character-printed merchandise were “favorable character” (39.0%) and “character design (appearance)” (37.9%) were similarly high, followed by “merchandise quality” (33.4%), “merchandise price” (28.7%), and “character awareness/popularity” (23.4%) (based on 1st and 2nd picks combined).

Looking at the characteristics of respondents, the proportion of women who considered “character design (appearance)” was relatively high, while the proportion of men who considered "favorable character" was relatively high.

By age, the proportion of those in their teens who considered “favorable character” was relatively high, while the proportion of those in their 20s who considered “character design (appearance)” was relatively high.

Figure 11 Main Considerations when Purchasing Character-printed Merchandise

(Base: People with Experience of Purchasing Character-printed Merchandise, Unit: %)

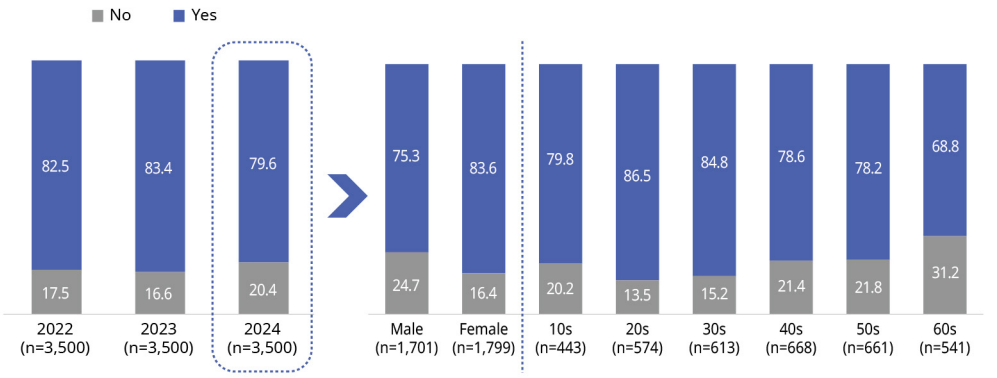

2-10. Experience of Using (Purchasing) Digital Character Merchandise

79.6% of respondents answered “Yes” to whether they had the experience of using (purchasing) digital character merchandise in the past year.

Looking at the characteristics of respondents, the experience of using (purchasing) was relatively higher among women and those in their 20s and 30s.

Figure 12 Experience of Using (Purchasing) Digital Character Merchandise

(Base: Total, Unit: %)

2-11. Experience and Reason for Visiting Character Pop-up Store

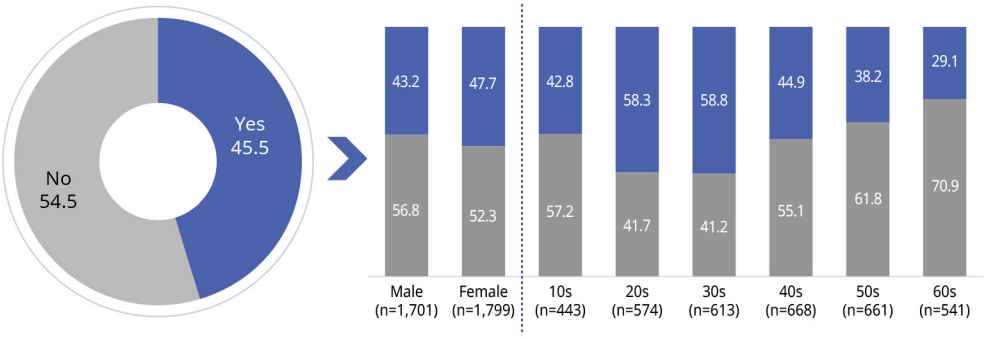

(1) Experience of Visiting Character Pop-up Store

45.5% of respondents answered “yes” to whether they had the experience of visiting a character pop-up store.

Looking at the characteristics of the respondents, the visit experience was relatively higher among women and those in their 20s and 30s.

Figure 13 Experience of Visiting Character Pop-up Store

(Base: Total, Unit: %)

(2) Reason for Visiting Character Pop-up Store

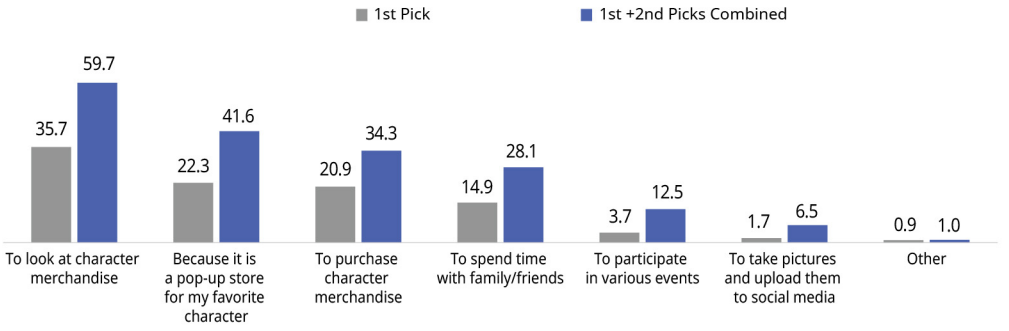

Regarding the reason for visiting character pop-up store, “to look at character merchandise” was the highest at 59.7%, followed by “because it is a pop-up store for my favorite character” (41.6%), “to purchase character merchandise” (34.3%), and “to spend time with family/friends” (28.1%).

Looking at the characteristics of respondents, men were relatively more likely to respond that they visited “to purchase character merchandise” and “to participate in various events,” while women were relatively more likely to respond that they visited “to look at character merchandise” and “because it is a pop-up store for my favorite character.”

By age, teens were more likely to respond that they visited “because it is a pop-up store for my favorite character,” while those in their 30s and older were more likely to respond that they visited “to look at character merchandise.”

Figure 14 Reason for Visiting Character Pop-up Store

(Base: People with Experience of Visiting Character Pop-up Store (n=1,594), Unit: %)

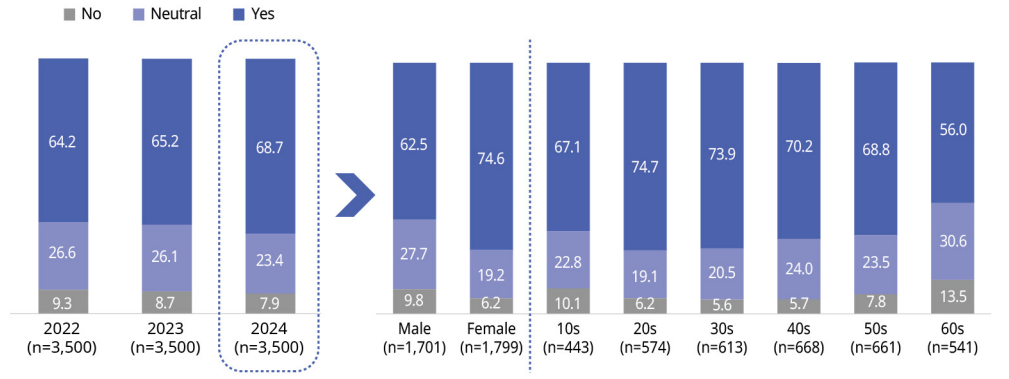

2-12. Character's Influence on Purchase Decision when Purchasing Merchandise

When asked how much influence characters have on purchasing decisions when purchasing merchandise, 68.7% responded "Yes."

When looking at the characteristics of respondents, the "yes" response that characters influence purchasing decisions when purchasing merchandise was relatively high among women and those in their 20s and 30s.

Figure 15 Character's Influence on Purchase Decision when Purchasing Merchandise

(Base: Total, Unit: %)

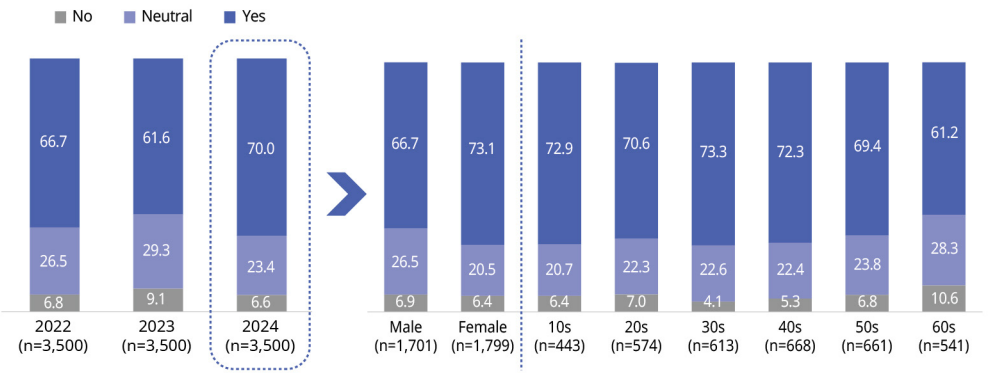

2-13. Character"s Influence on Decision when Selecting Cultural Content

When asked how much influence characters have on the decisions when selecting cultural content, 70.0% responded “yes” that they influence the decision.

When examining the characteristics of respondents, the “yes” response that characters have an influence on the decision when selecting cultural content was relatively higher among women.

Figure 16 **Character’s Influence on Decision when Selecting Cultural Content**

(Base: Total, Unit: %)

2-14. Maximum Willingness to Pay for Character Usage Per Instance

The maximum willingness to pay for character usage per instance was “$50 (66,169 won)” on average.

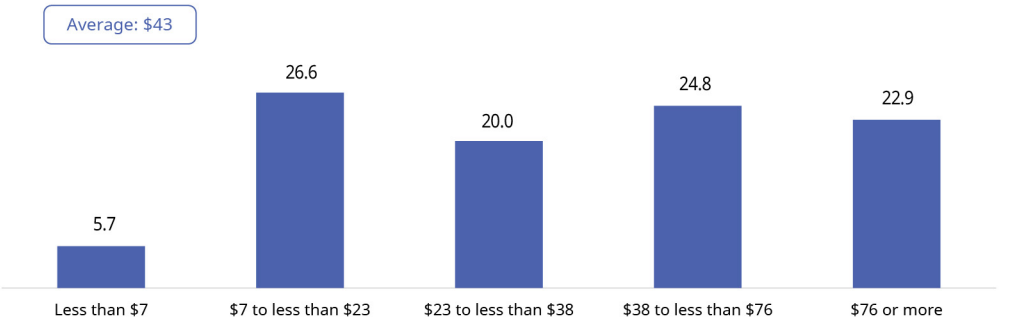

In detail, it was found to be “$7-23 (10,000-30,000 won)” (26.6%), “$38-76 (50,000-100,000 won)” (24.8%), and “$76 or more (100,000 won or more)” (22.9%).

Looking at the characteristics of respondents, the average maximum

amount that can be spent was relatively high among teenagers at “$69 (90,549 won).”

Figure 17 Maximum Willingness to Pay for Character Usage Per Instance

(Base: Total, Unit: %, Won)

Note) 2023 Bank of Korea average exchange rate (basic rate of exchange) [1 U.S. dollar = 1,305 won (decimals rounded down)]

2-15. Maximum Number of Expenditures for Character Use Annually

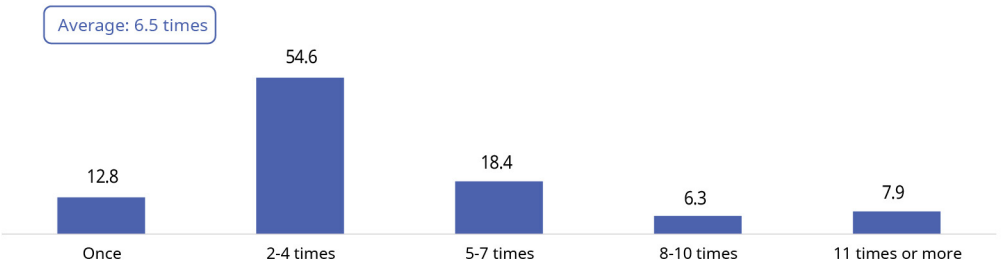

The average number of times users would pay for character use annually was “6.5 times.”

In detail, “2-4 times” was the highest at 54.6%, followed by “5-7 times” (18.4%) and “once” (12.8%).

Looking at the characteristics of respondents, the average number of expenditures for character use per year was relatively higher in younger age groups.

Figure 18 Maximum Number of Expenditures for Character Use Annually

(Base: Total, Unit: %, Time)

2-16. Intent to Purchase Merchandise Related to Preferred Character

When asked which merchandise related to their favorite characters they would be willing to purchase, the purchase intentions for “toys” (48.0%), “fashion/miscellaneous merchandise” (47.7%), and “daily necessities” (47.2%) were similarly high, followed by “hobby merchandise” (36.1%) and “games” (27.1%) (based on 1st, 2nd, and 3rd picks combined).

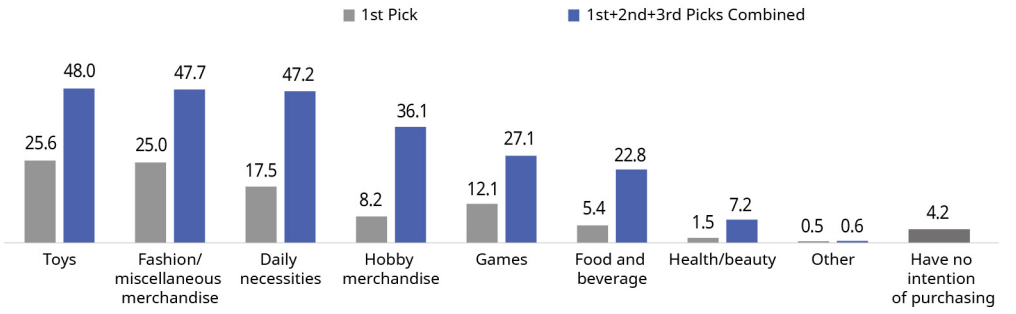

Meanwhile, 4.2% of respondents answered that they “have no intention” of purchasing.

Looking at the characteristics of respondents, men showed a relatively high purchase intention for “games,” while women showed a relatively high purchase intention for “toys,” “fashion/miscellaneous merchandise,” and “daily necessities.”

By age, the purchase intentions for “games” were relatively high for teenagers, “toys” for those in their 20s and 40s, and “fashion/miscellaneous merchandise” and “daily necessities” for those in their 50s and 60s.

Figure 19 Intent to Purchase Merchandise Related to Preferred Character

(Base: Total, Unit: %)

3. Main Survey Results (Age 3-9)

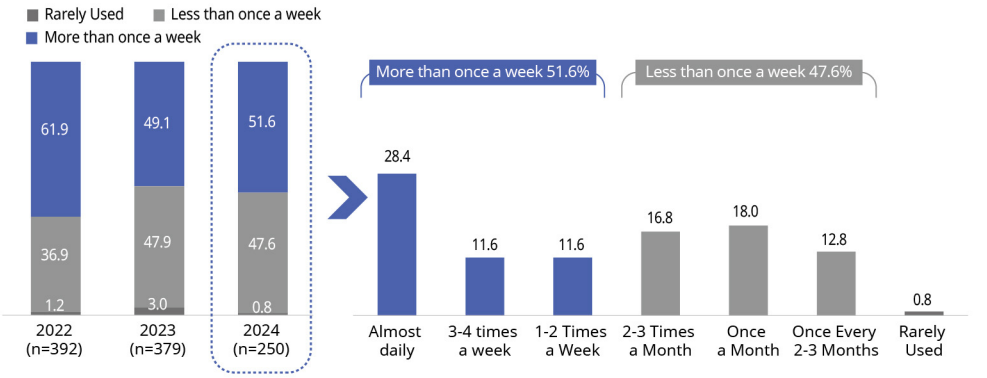

3-1. Frequency of Character Use

(1) Frequency of Character Merchandise Use

The frequency of using character merchandise by children aged 3-9 was found to be “more than once a week” at 51.6%, and in detail, “almost daily” was the highest at 28.4%.

Figure 20 Frequency of Character Merchandise Use

(Base: Total, Unit: %)

(2) Frequency of Character-printed Merchandise Use

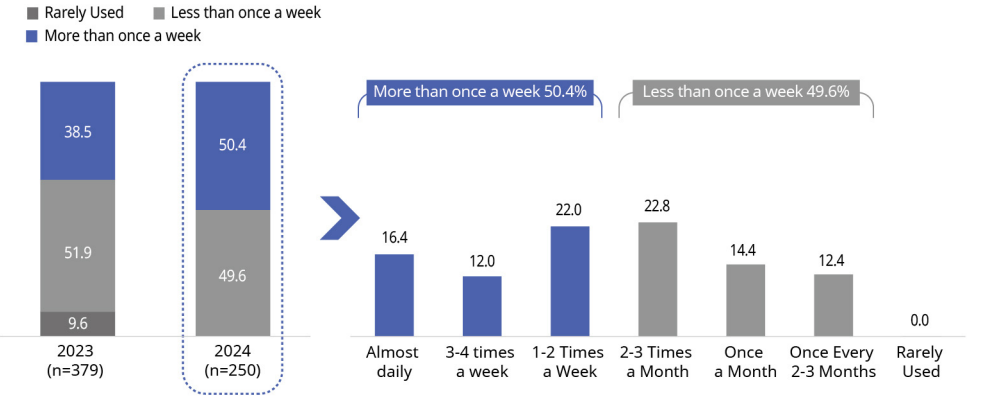

The frequency of character-printed merchandise use was 50.4% for “more than once a week” and 49.6% for “less than once a week.”

In detail, “2-3 times a month” (22.8%) and “1-2 times a week” (22.0%) were similarly high.

“More than once a week” use was relatively higher among 3 to 5 years olds.

Figure 21 Frequency of Character-printed Merchandise Use Using Character-printed Merchandise

(Base: Total, Unit: %)

3-2. Most Favored Character

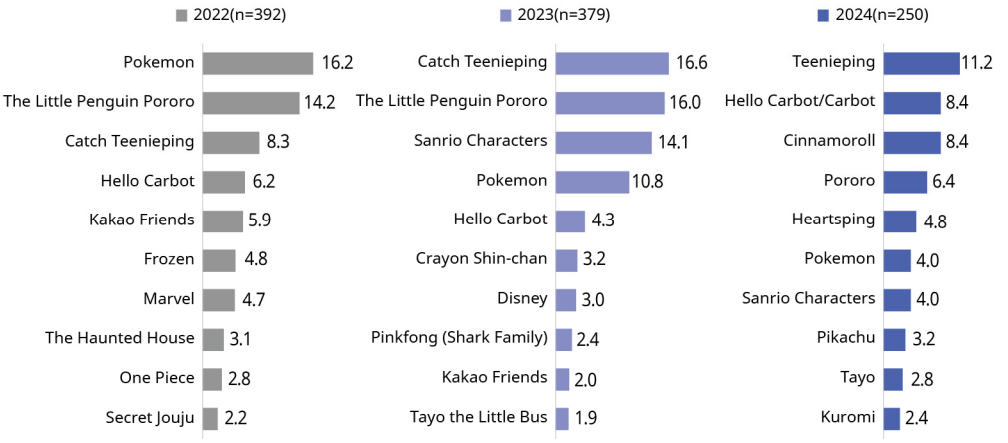

The most favored character was <Catch Teenieping> at 11.2%, followed by <Hello Carbot/Carbot> (8.4%), <Cinnamoroll> (8.4%), and <Pororo> (6.4%).

<Catch Teenieping> was ranked first for girls, and <Hello Carbot/Carbot> was ranked first for boys.

By age, <Hello Carbot/Carbot> was ranked first for ages 3-5, and <Cinnamoroll> was ranked first for ages 6-9.

Figure 22 Most Favored Character

(Base: Total, Unit: %)

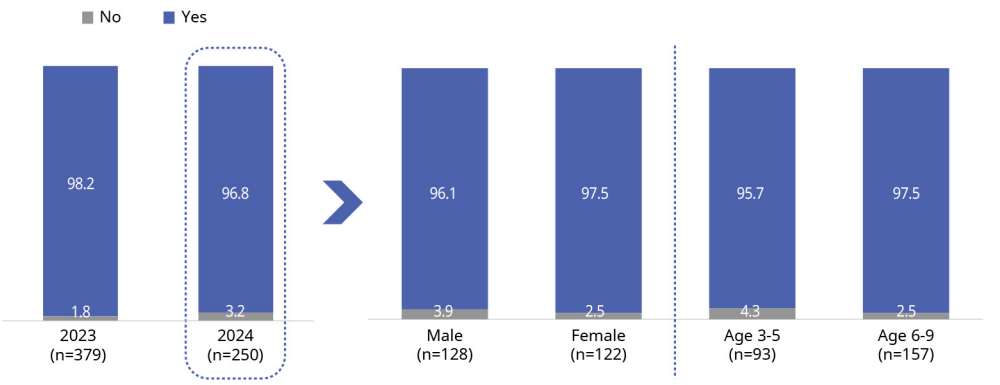

3-3. Experience of Purchasing Character Merchandise

The “yes” response rate that they had experience purchasing character merchandise among children aged 3-9 in the past year was very high at 96.8%.

Figure 23 Experience of Purchasing Character Merchandise

(Base: Total, Unit: %)

3-4. Type of Character Merchandise Purchased

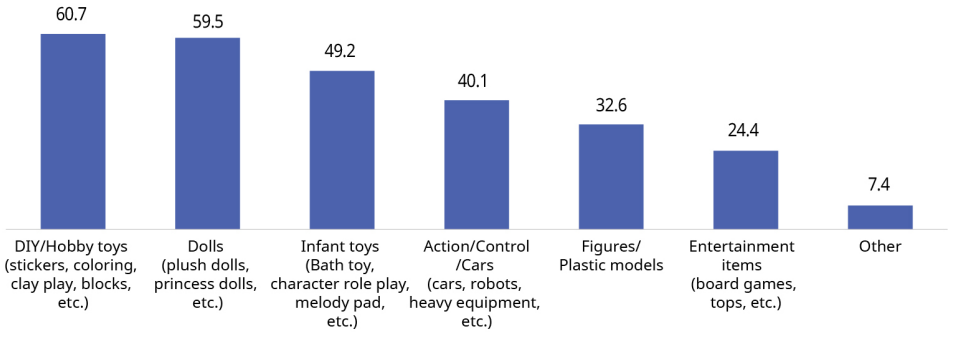

The types of character merchandise purchased for children aged 3-9 were similarly high for “DIY/hobby toys” (60.7%) and “dolls” (59.5%).

Next were “infant/toddler toys” (49.2%), “action/control/cars” (40.1%), etc.

By gender, girls purchased “dolls” the most, while boys purchased “action/control/cars” the most. By age, “infant/toddler toys” were high for children aged 3-5, and “dolls” and “DIY/hobby toys” were high for children aged 6-9.

Figure 24 Type of Character Merchandise Purchased

(Base: People with Experience of Purchasing Character Merchandise (n=242), Duplicate Responses, Unit: %)

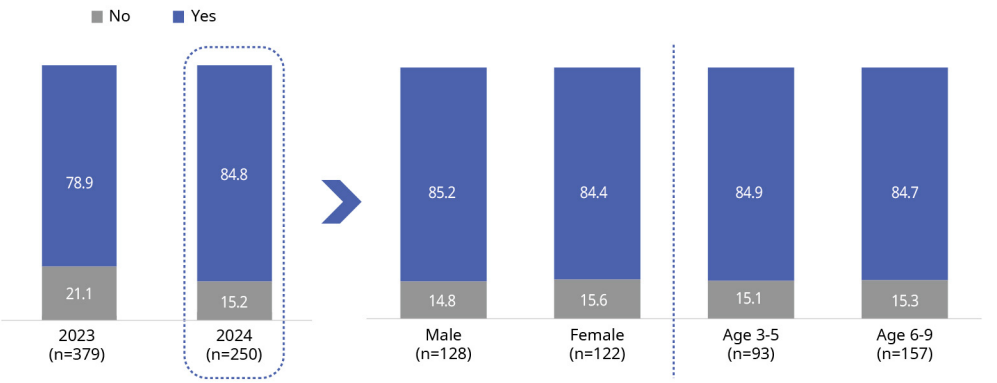

3-5. Experience of Purchasing Character-printed Merchandise

84.8% of respondents answered “yes” that they had experience of purchasing character-printed merchandise for their children aged 3-9 in the past year.

Figure 25 Experience of Purchasing Character-printed Merchandise

(Base: Total, Unit: %)

3-6. Type of Character-printed Merchandise Purchased

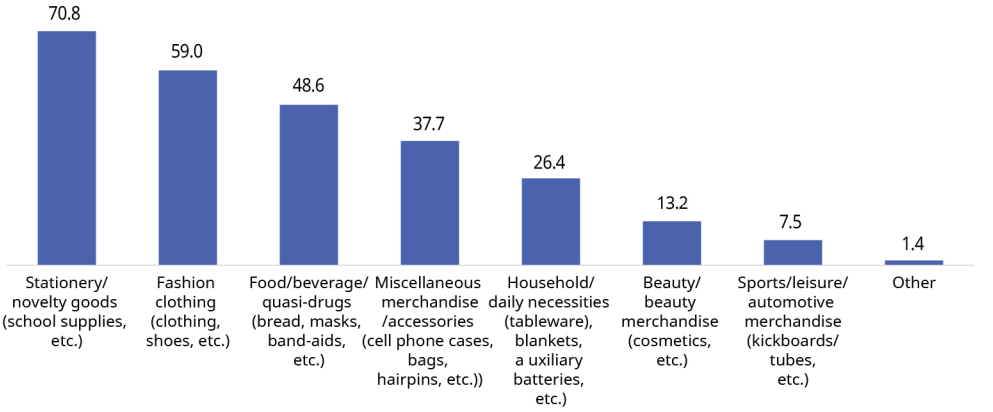

The type of character-printed merchandise purchased for children aged 3-9 was “stationery/novelty goods,” which was the highest at 70.8%.

Next were “fashion clothing” (59.0%), “food/beverage/quasi-drugs” (48.6%), and “miscellaneous merchandise/accessories” (37.7%).

“Stationery/novelty goods” was particularly high among girls aged 6-9.

Figure 26 Type of Character-printed Merchandise Purchased

(Base: People with Experience of Purchasing Character-printed Merchandise (n=212), Unit: %)

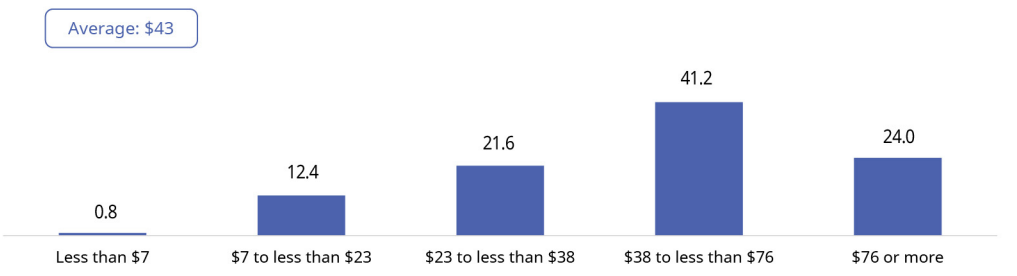

3-7. Maximum Willingness to Pay for Character Usage Per Instance

The maximum amount that users would spend to use a character each time was found to be “$43 (56,948 won)” on average.

In detail, the order was “$38 to less than $76 (50,000-100,000 won)” (41.2%), “$76 or more (100,000 won or more)” (24.0%), and “$23 to less than $38 (30,000-50,000 won)” (21.6%).

(Base: Total, Unit: %, Won)

Note) 2023 Bank of Korea average exchange rate (basic rate of exchange) [1 U.S. dollar = 1,305 won (decimals rounded down)]

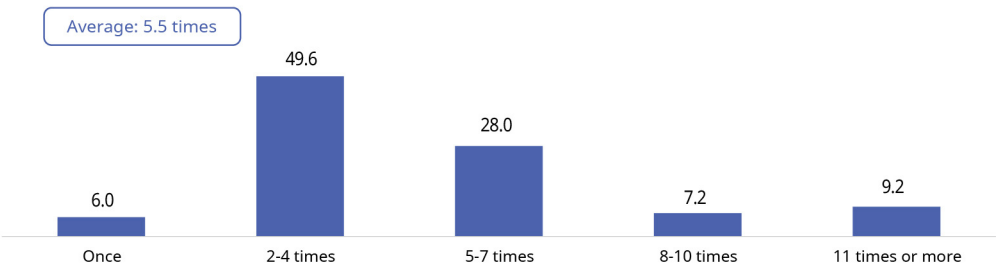

3-8. Maximum Number of Expenditures for Character Use Annually

The maximum number of times a year that users would pay for characters for their children aged 3-9 was found to be “5.5 times” on average.

In detail, “2-4 times” was the highest at 49.6%, followed by “5-7 times” (28.0%) and “11 times or more” (9.2%).

Figure 28 Maximum Number of Expenditures for Character Use Annually

(Base: Total, Unit: %, Time)

Part 2. Support Project

The Korea Creative Content Agency promoted various production and distribution support projects to enhance the capabilities of the Korean character industry and revitalize the licensing industry. The primary component of the support projects implemented in 2023 include the following;

1. Production Capabilities Enhancement

1-1. Supporting New Character IP Development and Commercialization

The New Character IP Development Support Project This project aims to enhance creativity and establish a strong foundation for the licensing industry by creating a new character IP. In 2023, twelve new character IPs were developed and discovered through this support project.

In addition, management support projects for new character IP development tasks were carried out to seek ways to strengthen commercialization capabilities through customized consulting and expert training for licensing and business activation for these tasks. By linking the results of new character IP development tasks with events such as Character Licensing Fairs, we have also pushed forward with various promotions, such as holding showcases to show the results and share know-how.

1-2. Supporting Content IP Licensing

The Content IP Licensing Support Project aims to revitalize the licensing business using content IP. To discover and activate content IP suitable for the diversified production, distribution, and consumption environment, we selected 26 tasks and supported their production, development, and marketing costs of the tasks that promote the licensing business by utilizing excellent domestic content IP. Through this, we facilitated the expansion of various genres of excellent content IP and the activation of additional businesses, thus strengthening the foundation of the licensing industry.

1-3. IP Licensing Build-up

IP Licensing Build-up Project provides support to strengthen discovery, production, and business capabilities in the licensing area.

Among the industries that can license content IP, one theme park (Lotte World), one financial institution (Shinhan Financial Group), one manufacturer (S-Oil), and one communication company (Kakao) participated. Four companies for collaboration and nine companies for the market were selected through a contest and follow-up support in collaboration with five major companies.

In the case of companies selected for collaboration, Lotte World collaborated with NEEZ.N for <Gaeguniz> and DANKONG for <Super Kongs> (follow-up support), Shinhan Financial Group with OOSSO for <Uzzuzzu My Pet>, and S-Oil with ACOMMZ for <Dow-Dow>. In the case of market companies, Hyundai Department Store collaborated with <Ill Regalo>, <Ready'O>, <Be My Pet>, and <Clock House> IPs, and Kakao with <Manggom>, <Toshimee>, <Tintin Tinkle>, <Pax>, and <Kyuljerry> IPs.

Five platform companies and 13 participating companies joined the "2023

Content IP Market" held at COEX from November 28 to 30 after completing collaborative IP content production cost support, expert consultation, and prototype production.

2. Distribution Support

2-1. Character Licensing Fair

The "Character Licensing Fair," celebrating its 22nd anniversary, is the largest character licensing market in Korea. It consists of business-to-business (B2B) programs and business-to-consumer (B2C) events related to content IPs such as characters, animation, comics, games, and kidult.

In 2023, it was held for four days from July 13 to 16 at COEX Hall A in Seoul under the theme "Riding the Wave of Content into the World of Characters!" About 230 companies participated in the exhibition, and various special halls such as the Webtoon Special Hall, Buildup IP Collaboration Lab, and ESG Experience Hall were operated to provide things to enjoy.

In the Webtoon Special Hall, visitors could see popular webtoon IPs being used in merchandise, movies, and dramas. The Buildup IP Collaboration Lab led cooperation between large and small businesses through IP collaboration exhibitions between large companies such as Ottogi and NCsoft and small and medium-sized enterprises. In addition, the ESG campaign "Character Cycle Challenge" engaged visitors in directly donating dolls to promote environmental, social, and transparent management (ESG) practices.

The "Biz Matching Zone" actively supported 1:1 business meetings between participating companies and buyers. At the same time, the

“Consulting Hall” provided professional consultations on financial systems related to content, overseas expansion, labor, and legal disputes.

The Character Licensing Fair plans to continue supporting business activation and exports regarding domestic character licensing; hence, it aims to expand its scope to an event embracing all content genres along with the growing interest in the content IP industry.

2-2. Licensing Conference

“Licensing Con 2023,” Korea’s only business conference on content IP licensing, was held at COEX Studio 159 from November 28 to 30. Like 2022, the 2023 event was held offline with a simultaneous online broadcast.

The topic of the 2023 conference, which celebrated its fifth anniversary in 2019, was “Next Momentum of IP Business,” and it proposed the future direction of the industry by presenting a timely agenda. It began with a keynote speech by Tomokuni Tsuji, CEO of Sanrio, and consisted of five conference sessions and programs, including 13 lectures and four live talks.

“Licensing Con 2023” provided an opportunity to analyze the competitiveness of K-content IP and discuss forward-looking global strategies. In addition, it provided insights by reemphasizing the importance of changes such as flexible communication and combination with technology in the IP business environment, where industry boundaries are collapsing and fandom's influence is growing.

2-3. Character IP Merchandise Distribution Test Bed

To expand the distribution channels of small and medium character companies, we promoted a distribution support project to distribute

character merchandise in three movie theater pop-up stores (Kream) (Yeonnam-dong Palcibo Store, 2023 Content IP Market, Lotte Mall Gimpo Airport Branch) and three large distribution malls (Toys R Us Jamsil, Gimpo Airport, and Eunpyeong Branches, etc.) to support the sales of various products of approximately 40 small and medium-sized content companies. We organized an exhibition space in connection with the Character Licensing Fair and operated a pop-up exhibition in a theme park (Lotte World) to help small and medium content companies increase their sales and IP brand value.

2-4. Korea Content Awards - Character Category

The Korea Content Awards aims to encourage creative motivation and revitalize the industry by rewarding excellent domestic content and contributors to the development of the content industry. Thirty works were submitted for the “2023 Korea Content Awards - Character Category,” and five were selected as winners through two expert and public evaluation rounds.

The President’s Award went to <Cookie Run>, a character from the game company Devsisters, which has attracted a cumulative total of 200 million game users in 243 countries as of 2023. <Moono Crew>, <I am Odungi>, and <Harp and Friends> were selected for the Minister of Culture, Sports and Tourism Award, and <Dow-Dow> won the Korea Creative Content Agency Director’s Award.

产业白皮书

摘　要

第一章　角色使用现状

1. 调查设计

本次调查的对象是居住在全国的3~69周岁以下国民中，在最近一年内“2~3个月1次以上”使用过角色内容(角色商品、角色印刷商品、数字角色商品)的人，分成10~69周岁和3~9周岁两个年龄段分别进行了调查。

对于3至9周岁和10至13周岁的调查对象，由父母代为回答，但前提是调查对象必须是非父母本人并且在过去“每2至3个月至少使用一次”角色内容的子女。

调查中将调查执行机构(（株）Embrain Research)所拥有的调查参与人175万名作为抽样框，将截止2024年4月行政安全部的居民登记人口统计资料中的人口分成不同地区、性别和年龄段按比例分配以后,通过电子邮件、SNS及通知Talk等方式通知参与调查人，并根据角色内容具体使用情况，确保了最终标本。

调查周期为每年一次，如果没有特别提及，有关内容使用调查内容的回答标准，则定为2023年6月~2024年5月(最近一年)期间。

在2024年5~6月(2024.5.20~2024.6.20)一个月期间内通过在线问卷调查方式完成了资料收集。

2. (10~69周岁)主要调查结果

2-1. 角色使用频率 (10~69周岁)

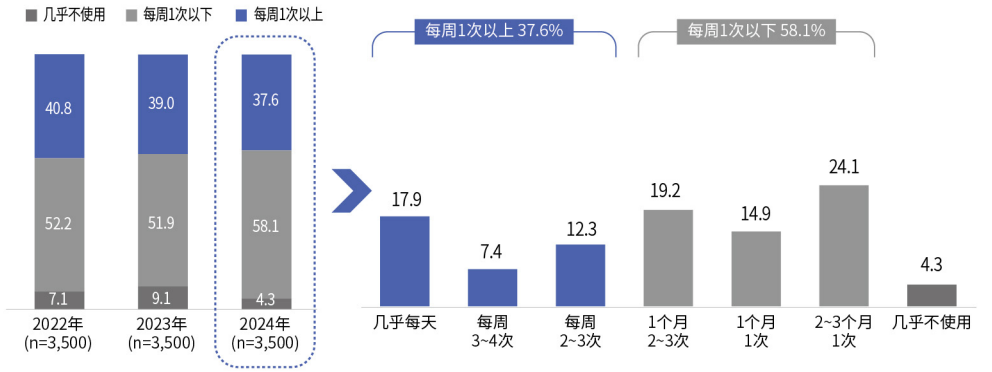

(1) 角色商品使用频率

角色商品使用频率，依次为“每周1次以上”占37.6%，“每周1次以下”占58.1%，其中“2 ~ 3个月1次”以24.1%居首位。

从受访者的特点来看，“每周1次以上”在女性和30岁段以下人群中相对较高。

图 1 角色商品使用频率

(Base: 全体, 单位: %)

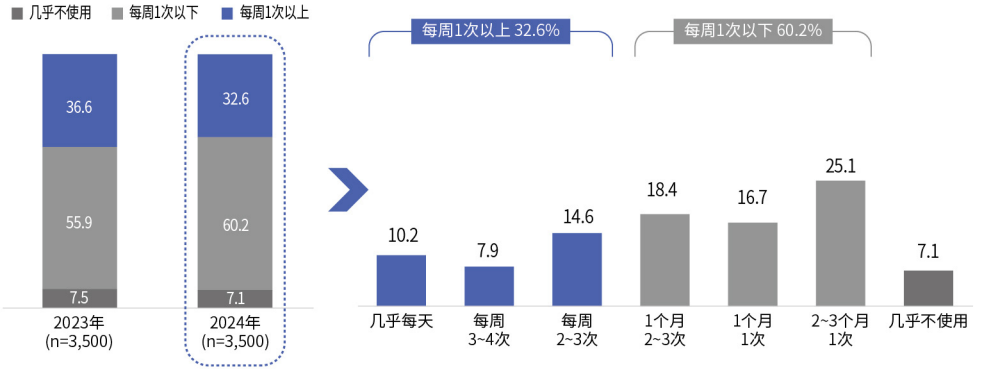

(2) 角色印刷商品使用频率

角色印刷商品使用频率，依次为“每周1次以上”占32.6%,“每周1次以下”占60.2%,其中“2 ~ 3个月1次”以25.1%居首位。

从受访者的特点来看，“每周1次以上”在女性和30岁段人群中相对较高。

图 2 角色印刷商品使用频率

(Base: 全体, 单位: %)

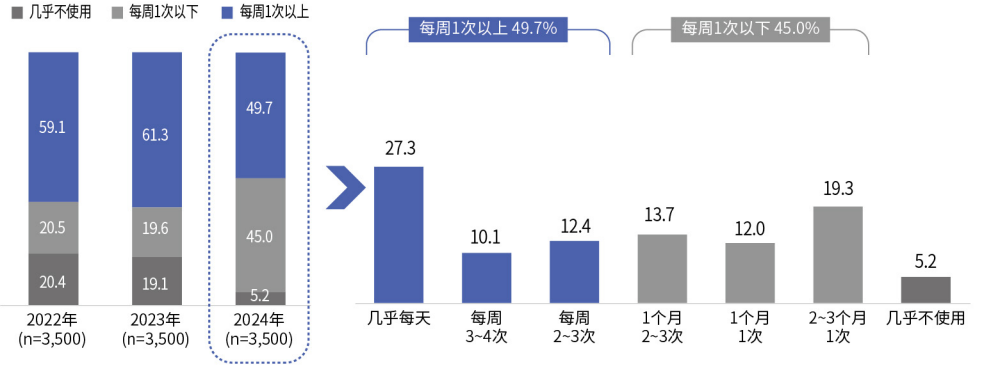

(3) 数字角色商品使用频率

在使用数字角色商品的频率方面，“每周1次以上”占49.7%,“每周1次以下”占45.0%，其中“几乎每天”占27.3%，所占比率最高。

从受访者的特点来看，在女性和30岁年龄段人群中“每周1次以上”使用的比率相对较高。

图 3 数字角色商品使用频率

(Base: 全体, 单位: %)

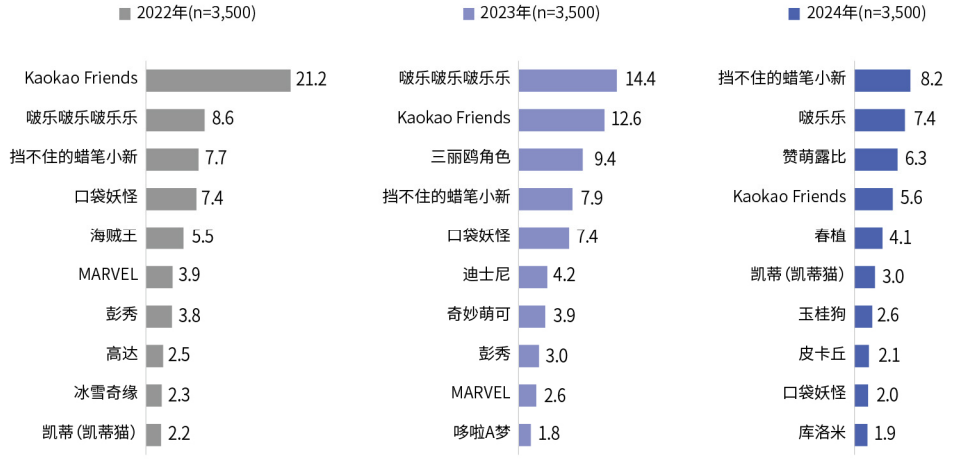

2-2. 最喜欢的角色

对最喜欢的角色，回答“挡不住的蜡笔小新”(8.2%)和“啵乐乐”(7.4%)比率最高，其次是“赞萌露比”(6.3%)、“Kaokao Friends”(5.6%)、“春植”(4.1%)等。

从受访者的特点来看，在30岁段以下“挡不住的蜡笔小新”排名第一，在40岁段和60岁段“啵乐乐”居首位，而在50岁段“Kaokao Friends”排在第一位。

图 4 最喜欢的角色

(Base: 全体, 单位: %)

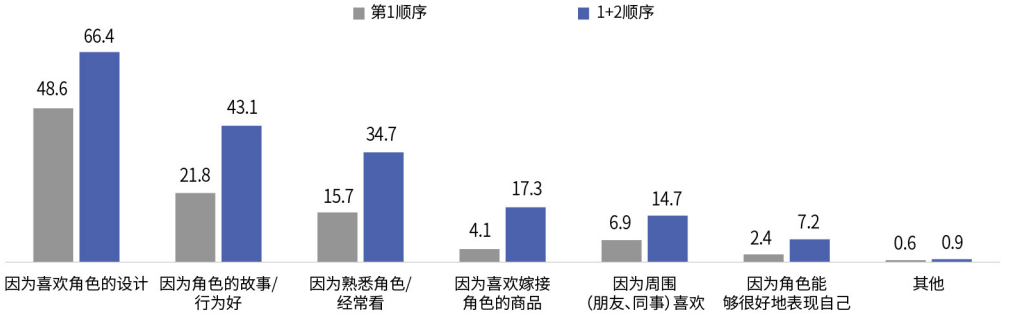

2-3. 最喜欢角色的喜欢理由

从最喜欢角色的喜欢理由来看,“因为喜欢角色的设计”以66.4%居首位，其次是“角色的故事/行为好”(43.1%)、“因为熟悉角色/经常看”(34.7%)等(以1+2顺序为准)。

从受访者的特点来看，“因为喜欢角色的设计”的回答在女性和年龄越低的人群中相对较高，“因为角色的故事/行为好”的回答在10岁段，“因为熟悉角色/经常看”的回答在男性人群中相对较高。

图 5 最喜欢角色的喜欢理由

(Base: 全体, 单位: %)

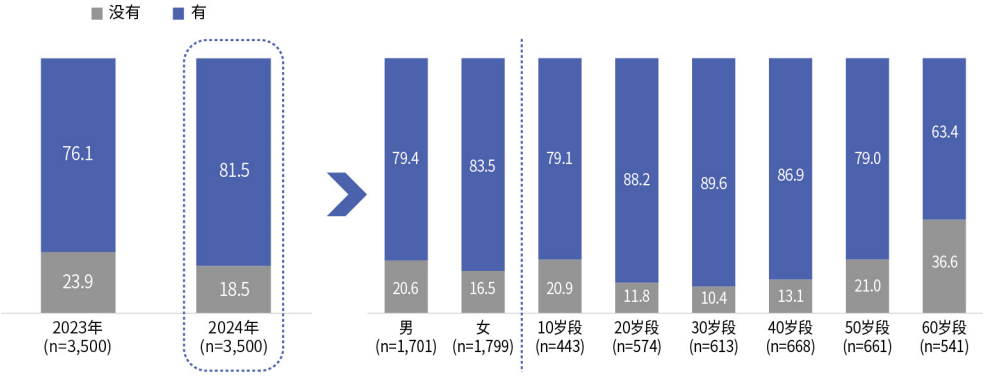

2-4. 角色商品购买经验

最近一年内“有”购买角色商品经验的比率为81.5%。

从受访者的特点来看，角色商品购买经验在女性和20岁~40岁段人群中相对较高。

图 6 角色商品购买经验

(Base: 全体, 单位: %)

2-5. 购买的角色商品类型

购买的角色商品类型中，“洋娃娃”的比率以64.9%居首位。

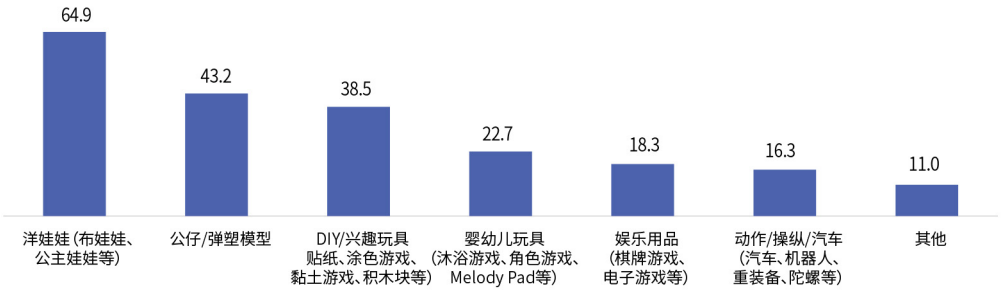

其次是“公仔/弹塑模型(43.2%)”、“DIY/兴趣玩具”(38.5%)、“婴幼儿玩具”(22.7%)等。

从受访者的特点来看，女性购买“洋娃娃”和“DIY/兴趣玩具”，而男性购买“公仔”和“娱乐用品”及“动作/操纵/汽车”的比率相对较高。

从年龄段来看，30岁段、40岁段和60岁段人群中购买“婴幼儿玩具”的比率相对较高。

图 7 购买的角色商品类型

(Base: 有角色商品购买经验的人(n=2,852)，重复回答，单位: %)

2-6. 购买角色商品时主要考虑因素

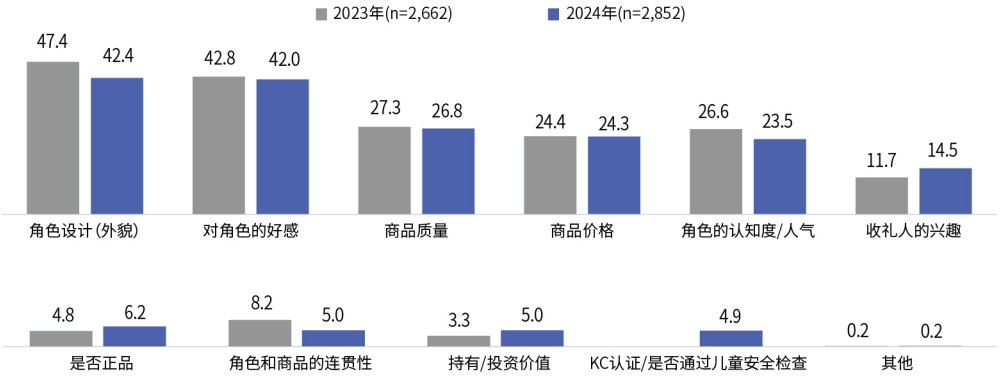

对购买角色商品时主要考虑的因素，回答“角色设计(外貌)”的(42.4%)和回答“对角色的好感”的(42.0%)相对较高，其次是“商品质量”(26.8%)、“商品价格”(24.3%)、“角色的认知度/人气”(23.5%)等(以1+2顺序为准)。

从受访者的特点来看，女性更多考虑“角色设计(外貌),而男性则更多考虑“对角色的好感”。

从年龄段来看，10岁段更多考虑“对角色的好感，20岁段更多考虑“角色设计（外貌）”。

图 8 购买角色商品时主要考虑因素

2-10. 数字角色商品使用(购买)经验

回答最近一年内“有”使用（购买）数字角色商品的占79.6%。

从受访者的特点来看，使用(购买)经验在女性、20岁段和30岁段人群中相对较高。

图 12 数字角色商品使用(购买)经验

(Base: 全体，单位: %)

2-11. 角色快闪店访问经验及理由

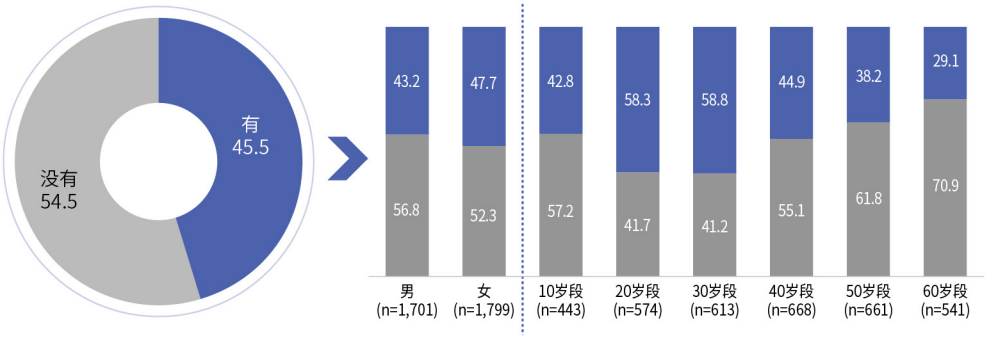

(1) 角色快闪店访问经验

回答“有”角色快闪店访问经验的占45.5%。

从受访者的特点来看，访问经验在女性、20岁段和30岁段人群中相对较高。

图 13 角色快闪店访问经验

(Base: 全体, 单位: %)

(2) 访问角色快闪店的理由

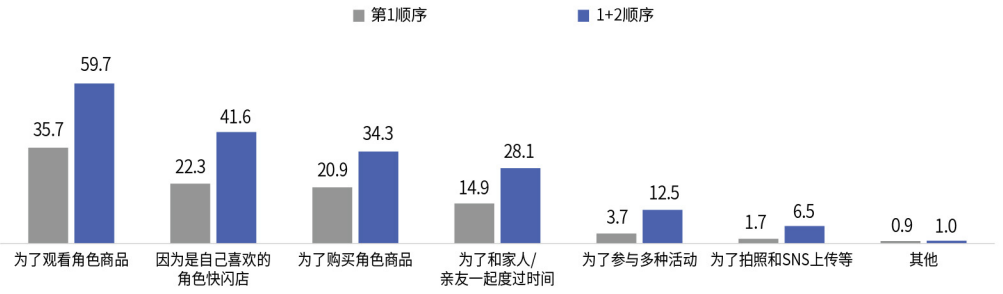

对访问角色快闪店的理由，回答“为了观看角色商品”的以59.7%居首位，其次是“因为是我喜欢的角色快闪店”(41.6%)、“为了购买角色商品”(34.3%)、“为了和家人/朋友一起度过时间”(28.1%)等。

从受访者的特点来看，男性回答“为了购买角色商品”和“为了参与各种活动”的相对较多，而女性回答“为了观看角色商品”和“因为是我喜欢的角色快闪店”的相对较多。

从年龄段来看，在10岁段回答“因为是我喜欢的角色快闪店”，在30岁段以上回答“为了观看角色商品”的比率相对较高。

图 14 访问角色快闪店的理由

(Base: 有访问过角色快闪店经验的人(n=1,594), 单位: %)

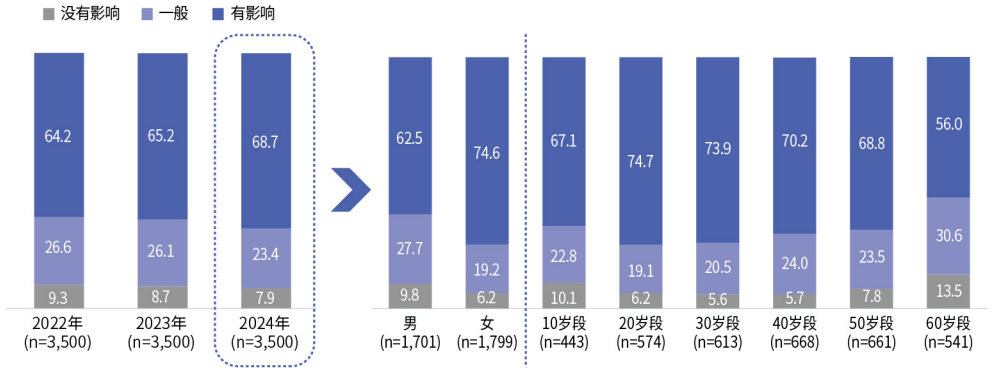

2-12. 购买商品时角色对决定购买所产生的影响

关于角色在平时购买商品时对决定购买产生多大影响的提问，回答“有影响”的占68.7%。

从受访者的特点来看，回答角色在购买商品时对决定购买“有影响”的比率，在女性、20岁段和30岁段中相对较高。

图 15 购买商品时角色对决定购买所产生的影响

(Base: 全体, 单位: %)

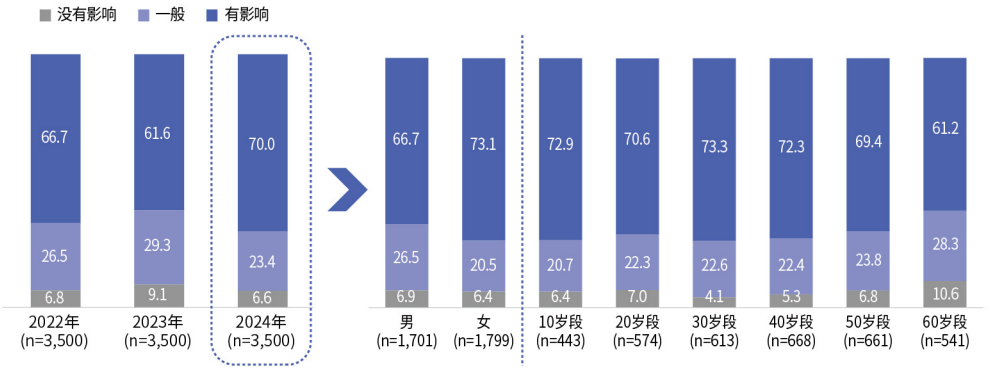

2-13. 选择文化内容时角色对最终决定所产生的影响

关于在选择文化内容时角色对最终决定产生多大影响的提问，回答“有影响”的占70.0%。

从受访者的特点来看，回答角色在选择文化内容时“有影响”的比率，在女性人群中相对较高。

图 16 选择文化内容时角色对最终决定所产生的影响

(Base: 全体, 单位: %)

2-14. 为使用角色每次最多可支出金额

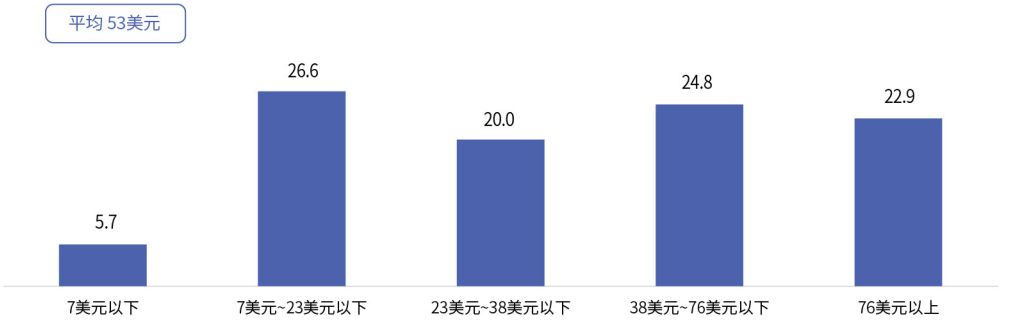

为了使用角色每次最多可支出金额平均为“50美元”(6万6,169韩元)。

具体来看，“7美元~23美元以下(1万~3万韩元以下)”(26.6%)、“38美元~76美元以下(5万~10万韩元以下)”(24.8%)、“76美元以上(10万韩元以上)”(22.9%)等。

从受访者的特点来看，最多可支出平均金额在10岁段“69美元(9万549韩元)相对较高。

图 17 使用角色时每次最多可支出金额

(Base: 全体, 单位: %, 韩元)

注) 韩国银行2023年韩元兑美元平均汇率(基本汇率) [1美元兑1，305韩元 (小数点以下取整数])

2-15. 为使用角色每年最多可支出次数

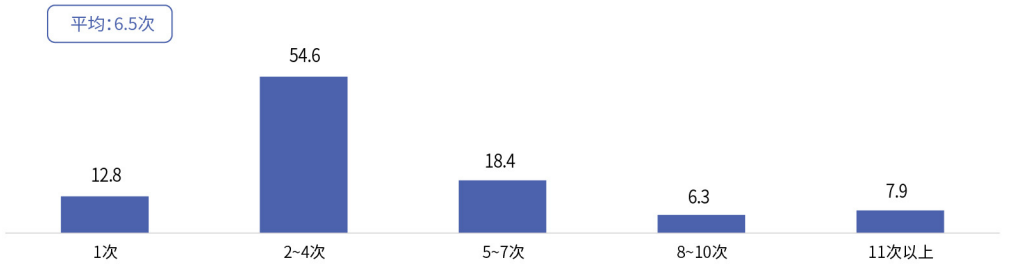

为了使用角色每年最多可支出次数平均为“6.5次”。

具体来看，“2~4次”以54.6%最高，其次是“5~7次”(18.4%)、“1次”(12.8%)等。

从受访者的特点来看，年龄越小，每年可支出的平均次数就越多。

图 18 使用角色时每年最多可支出次数

(Base: 全体, 单位: %, 次)

2-16. 喜欢的角色相关商品购买意向

关于在喜欢的角色相关商品中对哪些商品有购买意向的提问，回答“玩具”(48.0%)、“服装·杂货”(47.7%)和“生活用品”(47.2%)的相对较高，其次是“兴趣用品”(36.1%)、“游戏”(27.1%)等(以1+2+3顺序为准)。

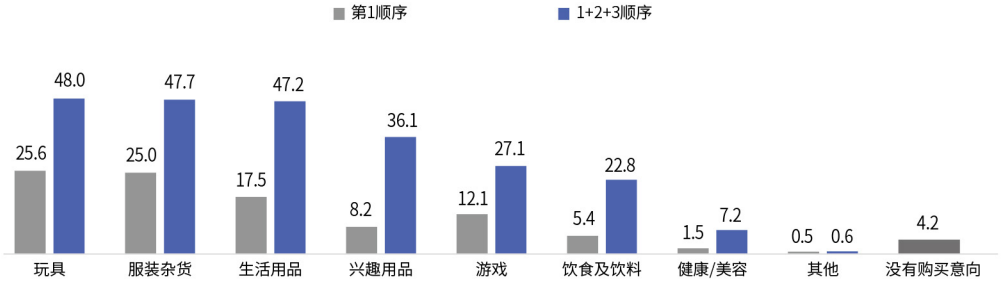

另外，回答“没有”购买意向的比率为4.2%。

从受访者的特点来看，男性对“游戏”的购买意向，女性对“玩具”、“服装·杂货”、“生活用品的购买意向相对较高。

从年龄段来看，在10岁段对“游戏”的购买意向，在20~40岁段对“玩具”，在50多段和60岁段对“服装·杂货”及“生活用品”的购买意向相对较高。

图 19 喜欢的角色相关商品购买意向

3. (3~9周岁)主要调查结果

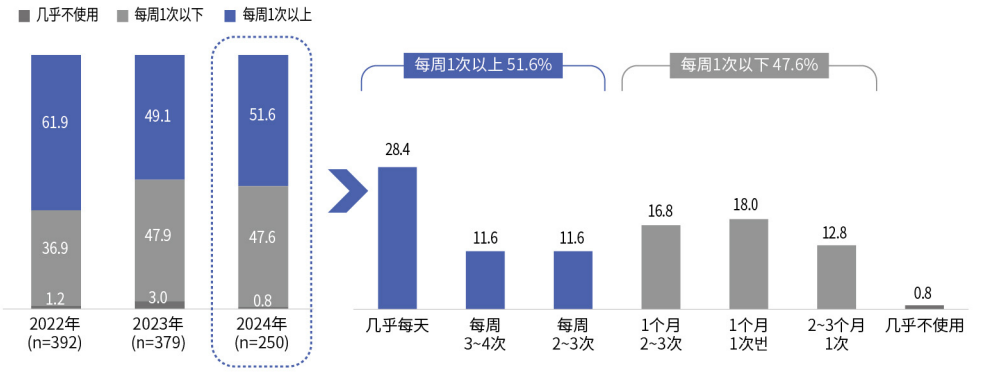

3-1. 角色使用频率

(1) 角色商品使用频率

在3~9周岁子女的角色商品使用频率中，“每周1次以上”的比率为51.6%，具体来看“几乎每天”以28.4%居首位。

图 20 角色商品使用频率

(Base: 全体，单位: %)

(2) 角色印刷商品使用频率

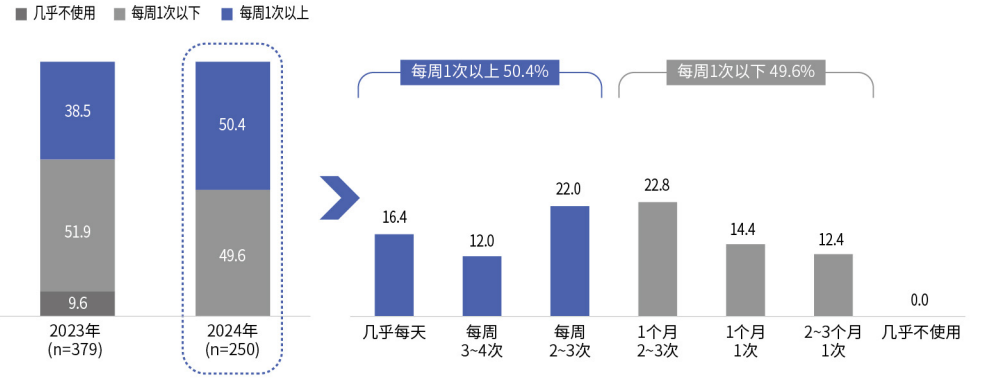

对角色印刷商品使用频率，回答“每周1次以上”的占50.4%,“每周1次以下”的占49.6%。

具体来看，“1个月2~3次”(22.8%)和“每周1~2次”(22.0%)的回答比率差不多高。

“每周1次以上”使用的回答比率在3~5岁年龄段中相对较高。

图 21 角色印刷商品使用频率

(Base: 全体, 单位: %)

3-2. 最喜欢的角色

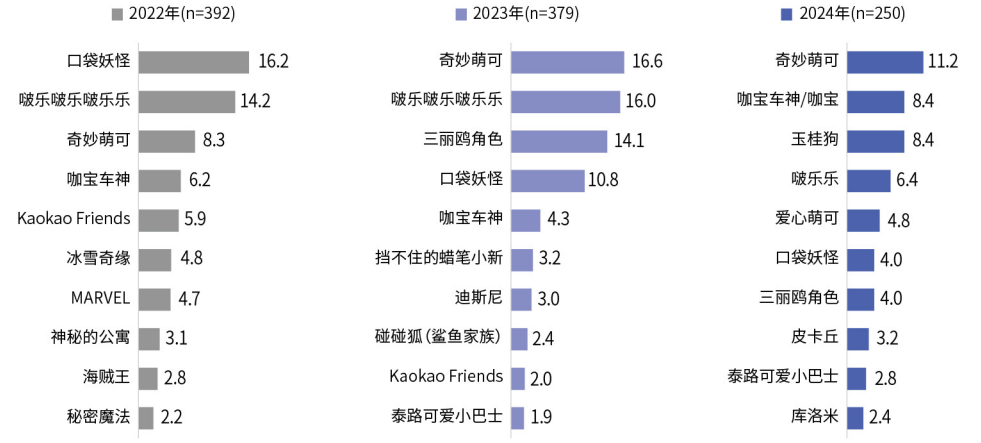

最喜欢的角色是“奇妙萌可”以11.2%居首位，其次是“咖宝车神/咖宝”(8.4%)、“玉桂狗”(8.4%)、“啵乐乐”(6.4%)等。

女孩最喜欢“奇妙萌可”，男孩最喜欢“咖宝车神/咖宝”。

从年龄段来看,3~5岁在“咖宝车神/咖宝”，6~9岁在“玉桂狗”居首位。

图 22 最喜欢的角色

(Base: 全体, 单位: %)

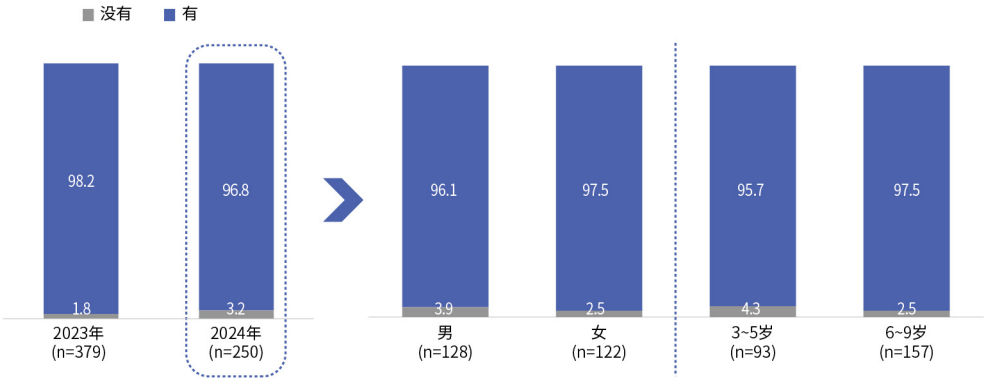

3-3. 角色商品购买经验

对最近一年内为3~9岁的子女购买角色商品的经验，回答“有”的以96.8%居首位。

图 23 角色商品购买经验

(Base: 全体, 单位: %)

3-4. 购买的角色商品类型

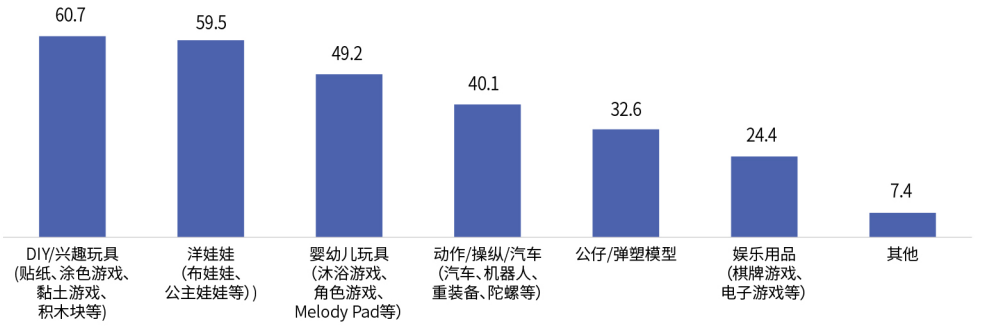

为3~9周岁子女购买的角色商品类型中，“DIY/兴趣玩具”(60.7%)和“洋娃娃”(59.5%)比率差不多高。

其次是“婴幼儿玩具”(49.2%)、“动作/操纵/汽车”(40.1%)等。

从性别来看,女孩购买“洋娃娃”的比率最高，男孩购买“动作/操纵/汽车”的比率最高。从年龄段来看，3~5岁购买“婴幼儿玩具”，6~9岁购买“洋娃娃”和“DIY/兴趣玩具”的比率相对较高。

图 24 购买的角色商品类型

(Base: 有购买角色商品经验的人(n=242), 重复回答, 单位: %)

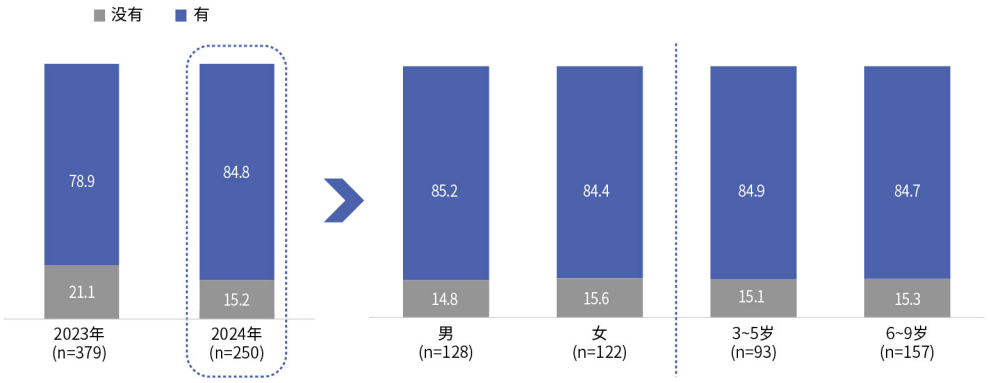

3-5. 角色印刷商品购买经验

对最近一年内为3~9周岁子女购买角色印刷商品的经验,回答“有”的占84.8%。

图 25 角色印刷商品购买经验

(Base: 全体, 单位: %)

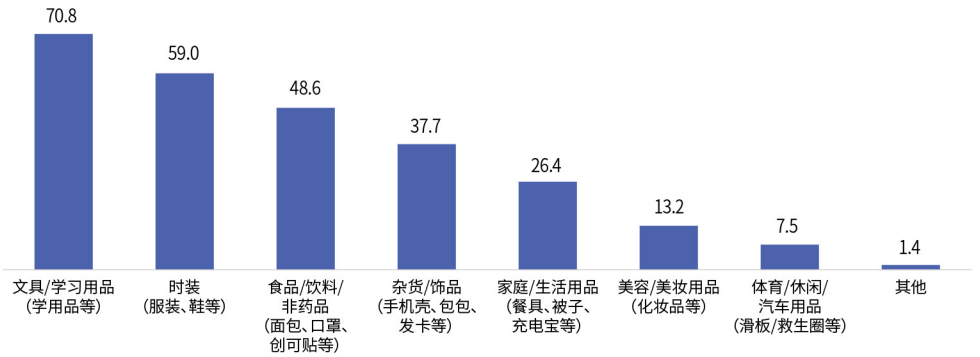

3-6. 角色印刷商品购买类型

为3~9周岁子女购买的角色印刷商品类型中，“文具/学习用品”以70.8%居首位。其次是“时装”(59.0%)、“食品/饮料/非药品”(48.6%)、“杂货/饰品”(37.7%)等。“文具/学习用品”在6~9岁女孩中所占高比率尤为明显。

图 26 购买的角色印刷商品类型

(Base: 有购买角色印刷商品经验的人(n=212)，单位: %)

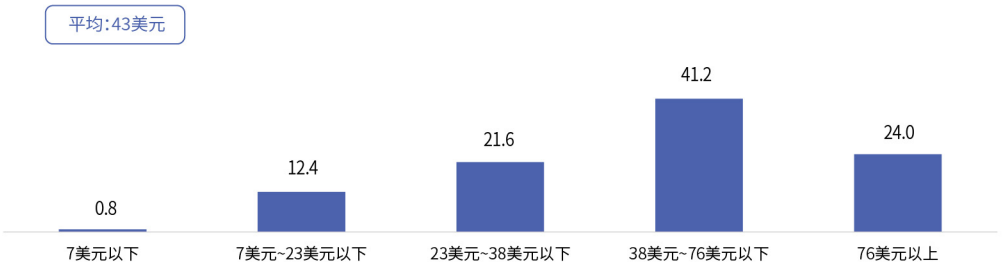

3-7. 为使用角色每次最多可支出金额

为了3~9周岁的子女使用角色，每次最多可支出金额平均“43美元(5万6,948元)”。

具体来看，“38美元~76美元以下(5万至10万韩元以下)”(41.2%)、“76美元以上(10万韩元以上)”(24.0%)、“23美元~38美元以下(3万至5万韩元以下)”(21.6%)等。

注) 韩国银行2023年韩元兑美元平均汇率(基本汇率) [1美元兑1，305韩元 (小数点以下取整数])

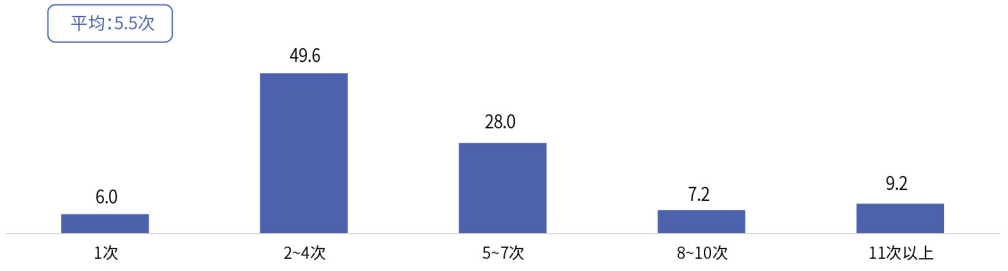

3-8. 为使用角色每年最多可支出次数

为了3 ~ 9周岁子女使用角色，每年最多可支出的次数平均为“5.5次”。

具体来看，“2 ~ 4次”以49.6%居首位，其次是“5 ~ 7次”(28.0%)、“11次以上”(9.2%)等。

图 28 使用角色时每年最多可支出次数

(Base: 全体, 单位: %, 次)

第二章　角色支持项目

韩国文化产业振兴院为增强韩国角色产业的竞争力并促进授权产业的发展，开展了多种制作和发行支持项目。2022年实施的支持项目主要内容如下。

1. 制作能力提升

1-1. 新角色IP开发与商业化支持

新角色IP开发支持项目旨在通过开发新角色IP，增强创作能力并构建授权产业的基础。2023年通过该支持项目，共开发和挖掘了12个新角色IP。

此外，还针对新角色IP开发任务同步推进了管理支持项目，为这些项目提供定制化的授权和商业化活跃化咨询服务以及专业培训，以加强其商业化能力。新角色IP开发任务的成果通过与角色授权博览会等活动相结合，开展和举办了成果展示及经验分享的展示会等多种形式的宣传推广活动。

1-2. 内容IP授权支持

内容IP授权支持项目旨在通过利用内容IP促进授权业务的活跃发展。该项目针对多样化的制作、发行和消费环境，挖掘适合的内容IP，并为此目的选定了26个任务，通过支持优秀韩国国产内容IP相关项目的制作、开发及营销费用，推动授权业务的开展。通过该项目，促进了优秀内容IP在多种类型领域的扩展及附加业务的活跃化，同时也为增强授权产业的基础做出了贡献。

1-3. IP授权构建

IP授权构建是一个利用大型企业平台，支持中小型内容企业通过现有内容IP开发授权领域，同时加强其制作能力和业务能力的支持项目。

在内容IP可应用的授权行业中，今年参与的领域包括主题公园（1家：乐天世界）、金融（1家：新韩金融）、制造（1家：S-OIL）、流通（1家：现代百货）以及通信（1家：Kakao）。项目与共计5家大型企业合作，通过公开招募及后续支持，最终选定了4家合作型企业和9家市场型企业参与其中。

在合作型企业中，乐天世界与neez.n的“GGNZ”和DANKONG的“超级豆子”(后续支援)合作，新韩金融与OOSSO的“uzzu mypet”合作，S-OIL与ACOMMZ的“DOW DOW”合作。而市场型企业中现代百货与“illregalo”、“radio”、“BEMYPET”、“CLOCKHOUSE”IP进行合作，KAKAO则与“坏掉的熊”、“TOSHIMee”、“tintintinkle”、“Pax”和“橘子果冻”IP进行合作。

5家平台公司与13家参与企业在完成合作内容制作费用支持、专家咨询及样品制作后，于11月28日至30日参加了在COEX举办的“2023内容IP市场”活动。

2. 发行支持

2-1. 角色授权博览会

第22届“角色授权博览会”是韩国国内规模最大的角色授权市场，活动不仅涵盖角色，还涉及动画、漫画、游戏、成人玩具等内容IP相关领域，包含企业间交易（B2B）项目以及企业与消费者交易（B2C）活动。

2023年，以“乘内容浪潮，进入角色的世界！”为主题的活动于7月13日至16日在首尔COEX A展馆举行，为期四天。约有230多家企业参展，并设立了网络漫画特别馆、构建IP协作研究所、ESG体验馆等多个主题馆，提供了丰富的互动体验。

在网络漫画特别馆，参观者可以看到被用于周边商品、电影、电视剧等的热门网络漫画IP。在构架IP协作研究所，通过展示Ottogi、NCSoft等大型企业与中小企业IP合作的案例，推动了大中小企业的共生合作。此外，还举办了参观者可以亲自捐赠玩偶的ESG公益活动“角色挑战”，实践了环境、社会和透明经营（ESG）的理念。

在“商务洽谈区”，为参展企业与买家之间的1对1商务会谈提供了积极支持，而在“咨询馆”，则提供了从与内容相关的金融制度到海外拓展、劳务、法律纠纷等专业咨询服务。

角色授权博览会计划继续推动韩国国产角色授权业务的活跃化和出口支持，同时随着对内容IP产业关注度的提升，将活动扩展至涵盖内容全品类的综合性盛会。

2-2. 举办授权会议

作为韩国唯一的内容IP授权领域商务会议，“授权会议2023”于2023年11月28日至30日在韩国世界贸易中心（COEX）Studio 159举行。与2022年相同，2023年的会议也以线下形式进行，并同时进行了线上直播。

自2019年创办以来，2023年是该会议的第五届，主题为“IP业务的全球跃进（Next Momentum of IP Business）”，分析IP业务行业的发展趋势，并通过提出及时的议题，为行业未来发展方向提供建议。活动以Sanrio首席执行官辻朋邦（Tsuji Tomokuni） 的主题演讲拉开帷幕，整个会议由5个分会场组成，涵盖13场演讲和4场直播对谈等丰富的活动内容。

“授权会议2023”成为分析K-内容IP竞争力及探讨未来全球化战略的重要平台。此外，在产业边界逐渐消解、粉丝影响力日益增强的IP业务环境中，会议强调了灵活沟通与技术融合等变革的重要性，并为与会者提供了深刻的见解与洞察。

2-3. 角色IP商品发行测试平台运营

为扩大中小角色企业的发行渠道，推进了在电影院关联快闪店（Cream Store）的3个地点（延南洞Palcevo、2023内容IP市场、乐天购物中心金浦机场店）以及大型流通商场的3个地点（乐天玩具反斗城蚕室店、金浦机场店、恩平店等）入驻角色商品的发行支持项目，从而支持了约40家中小内容企业的多样化商品销售。同时，与角色授权博览会相结合，设置了展示空间，并在主题公园（乐天世界）内运营快闪展览，帮助中小内容企业提升销售额并提高IP品牌价值。

2-4. 韩国内容大奖角色类

韩国内容大奖旨在表彰优秀内容及对内容产业发展作出贡献的人员，以激发从业者的创作热情并促进产业发展。“2023韩国内容大奖-角色类”共收到30部作品的参赛申请，通过两轮专家评审及公众评选，最终选出了5部获奖作品。

总统奖授予了游戏公司DevSisters的角色“Cookie Run”，该游戏截至2023年累计吸引了来自243个国家的2亿名使用者。文化体育观光部部长奖授予了“Moono Crew“、“虽然是五胞胎“和“哈普和朋友们“，而韩国文化产业振兴院院长奖由“Dow-Dow“获得。
