ANIMATION INDUSTRY WHITE PAPER

SUMMARY

Part 1 Animation User Trends

1. Research Design

The subjects of this research include Koreans between the ages of 3 to 59, living in Korea, and have been exposed to animation content in the past year.

The sample framework consisted of 1,160,000 research panels that were set up nationwide. The research was carried out according to the population component ratio, which was sorted by region, gender, and age, based on the July 2020 Resident Registratoin Population Statistics Data provided by the National Statistical Office.

The research is conducted once a year, in cases where there were no separate mentions concerning content use research, the response standard covered the period from August 2019 to August 2020 (the previous year). Data collection began from August 6 to 28, 2020 by an online research method.

Table 1 2020 Factual Research Design for Animation Users

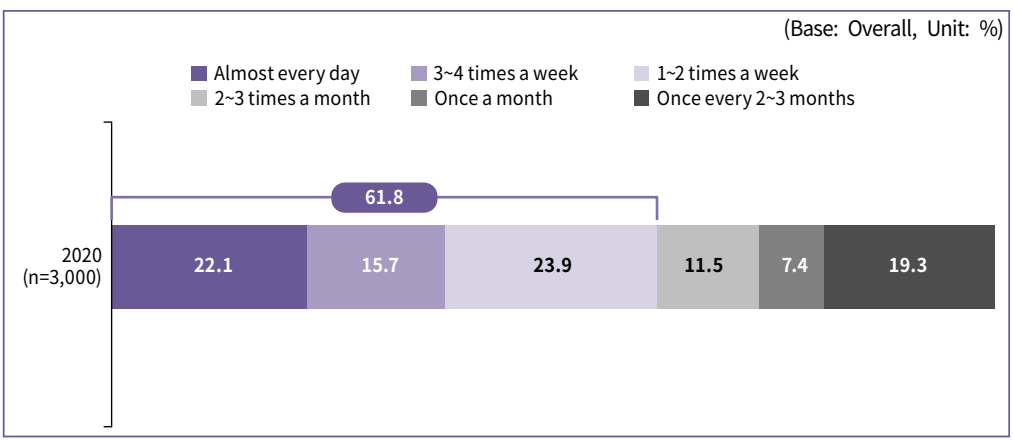

Classification	Content
Target Population	All Koreans aged 3-59
Research Population	Koreans aged 3-59 who were exposed to animation contents in the past year
Research Areas	17 cities and provinces nationwide
Data Collection Method	Online research through a structural survey
Sample Framework	Resident registration population statistics status as of July 2020 provided by the Ministry of Interior and Safety 1,160,000 research panels nationwide, run by the research institution, were used as the sample framework
Sampling Method	Proportional allocation according to region/gender/age
Valid Sample	3,000 people
Sampling Error	±1.79%p at 95% confidence level
Data Collection Period	August 2020 (Aug 6, 2020 – Aug. 28, 2020)

2. Frequency of Use of Animation Contents in the Past Year

Based on the frequency of animation contents consumption, “1-2 times a week” ranked the highest with 23.9%. It was followed by “Almost every day” (22.1%), “Once every 2-3 months” (19.3%), and “3-4 times a week” (15.7%), with 61.8% of all respondents consuming animation content more than once a week.

The rate of being exposed to animation “Almost every day” was relatively higher for “Women” (22.9%) than for “Men” (21.5%), while the rate of respondents in the “3-4 years old” age group was relatively high at 63.6%.

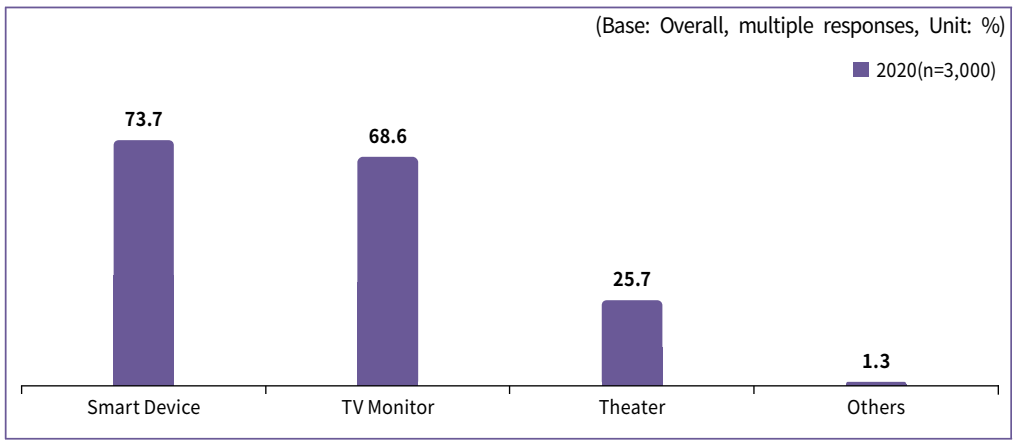

Figure 1 Frequency of Use of Animation Contents in the Past Year

3. Media Used for Viewing Animation in the Past Year

Based on the media used for viewing animation, the percentage of respondents answered “Smart device” (73.7%) and “TV monitor” (68.6%) was high. “Men” (74.8%) had a relatively higher rate of usage through a “Smart device” than “Women” (72.4%). Likewise, the usage rate of “Smart device” by “15-19 years old users” (90.9%) and “25-29 years old users” (89.7%) was relatively high.

Figure 2 Media Used When Viewing Animation

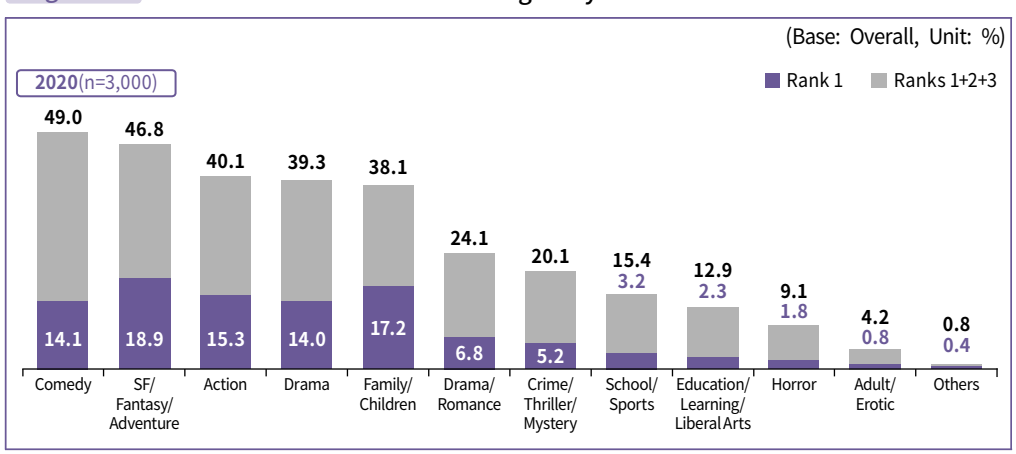

4. Regularly Watched Animation Genres

The animation genre regularly watched by the users was “Comedy,” with the highest percentage of 49.0% based on ranks 1, 2, and 3, followed by “SF/Fantasy/Adventure” with 46.8%.

“Women” (50.8%) had a higher percentage of watching “Comedy” than “Men” (47.5%), as well as the “25-29 years old” (54.8%) age group, which also preferred watching “Comedy.”

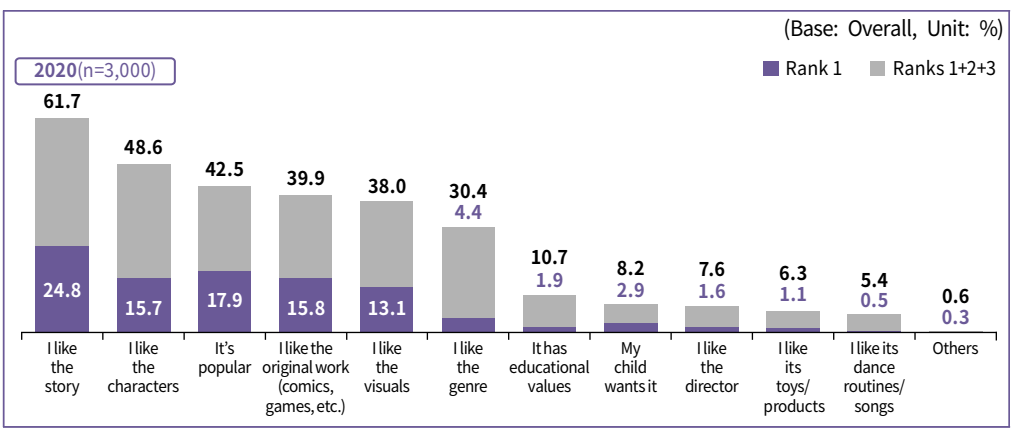

Figure 3 Animation Genres Watched Regularly

5. Selection Criteria When Using Animation

Regarding the selection criteria (based on ranks 1, 2, and 3) when users watch animation, “I like the story” received the highest percentage at 61.7%, followed by “I like the characters” (48.6%), “It’s popular” (42.5%), and “I like the original work (comics, games, etc.)” (39.9%). “Women” (64.0%) generated a higher percentage of choosing “I like the story” than “Men” (59.7%), while the “20-24” (67.4%) and “50-59” (68.2%) age groups’ ratio of considering “I like the story” as an animation selection criterion was also relatively high.

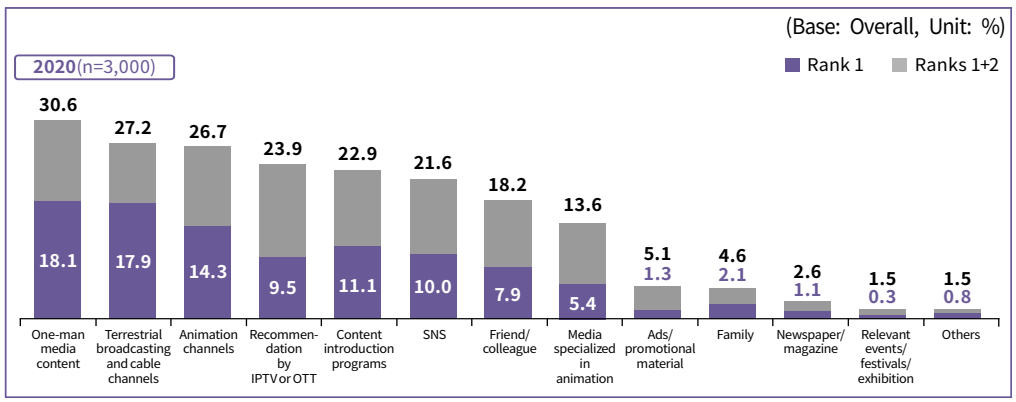

Figure 4 Selection Criteria When Using Animation

6. Animation-Related Information Acquition Paths for the Users

As for how animation-related information was acquired is based on ranks 1+2, “One-man media content” (30.6%), “Terrestrial broadcasting and cable channels” (27.2%), and “Animation channels” (26.7%) were shown in such order. “Men” (33.7%) tended to use “One-man media content” more than “Women (27.0%)', and in the “3-4 years old age group” (48.5%), the percentage of those responding with “One-man media content” was also high.

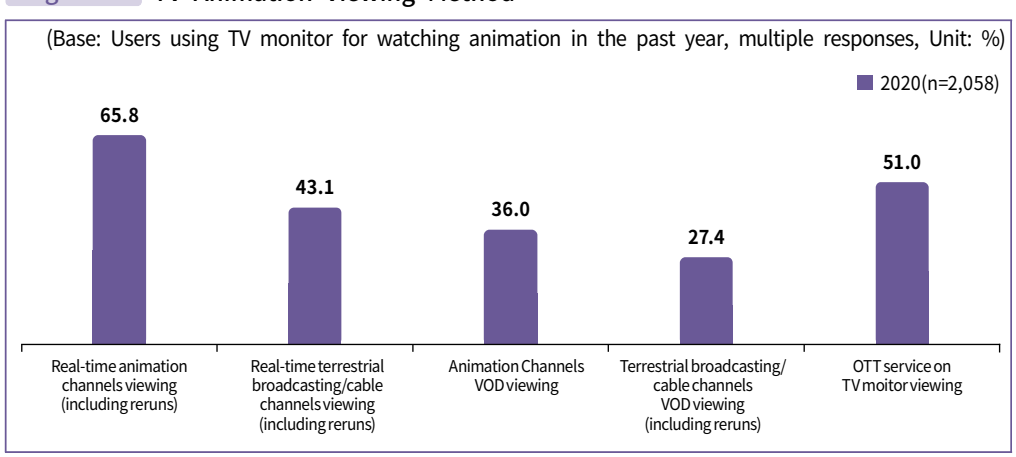

Figure 5 Acquisition Path by Which Respondents Received Animation-related Information

7. TV Animation Viewing Method

Based on the viewing method of TV animation users, “Real-time animation channels viewing (including reruns)” showed the highest response rate with 65.8%. The response for watching animation on a TV monitor was not significantly different in terms of gender, while the percentage of respondents in the “5-9 years old” (77.7%) and “10-14 years old” (75.0%) age groups with “Real-time animation channels viewing (including reruns)” was also relatively high.

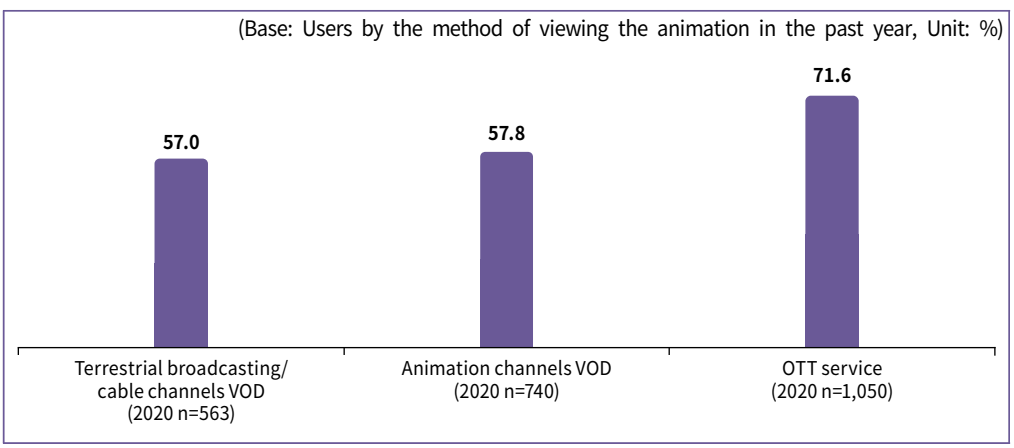

Figure 6 TV Animation Viewing Method

8. Paid Experience in Using TV Animation Viewing Media

Regarding the paid experience in using TV animation viewing media, more than 57.0% of respondents said they used “Terrestrial broadcasting/cable channels VOD,” “Animation channels VOD” and “OTT service,” with the paid experience in using “OTT service” (71.6%) being relatively high.

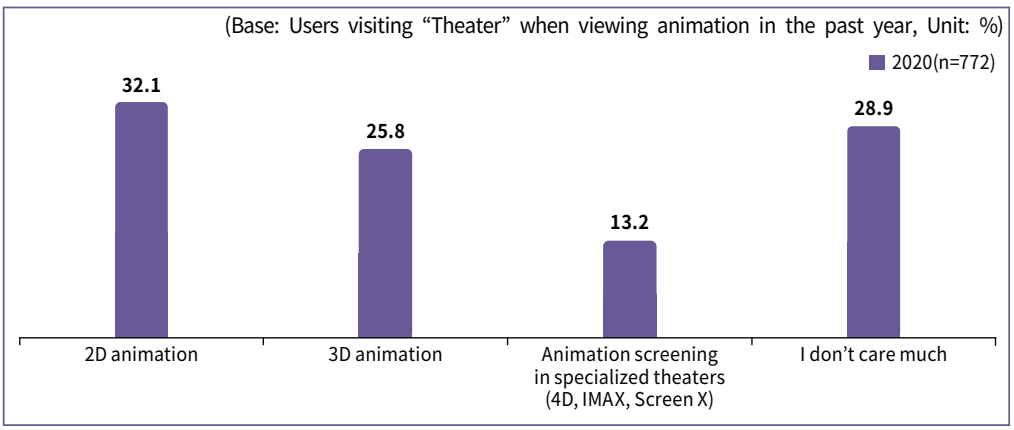

Figure 7 Paid Experience in Using TV Animation Viewing Media

9. Preferred Viewing Type for Theatrical Animation

When asked about the type of viewing they prefer among theatrical animation contents, the most frequent response was “2D animation” with 32.1%. It was followed by “I don’t care much” (28.9%), “3D animation” (25.8%), and “Animation screening in a specialized theater” (13.2%).

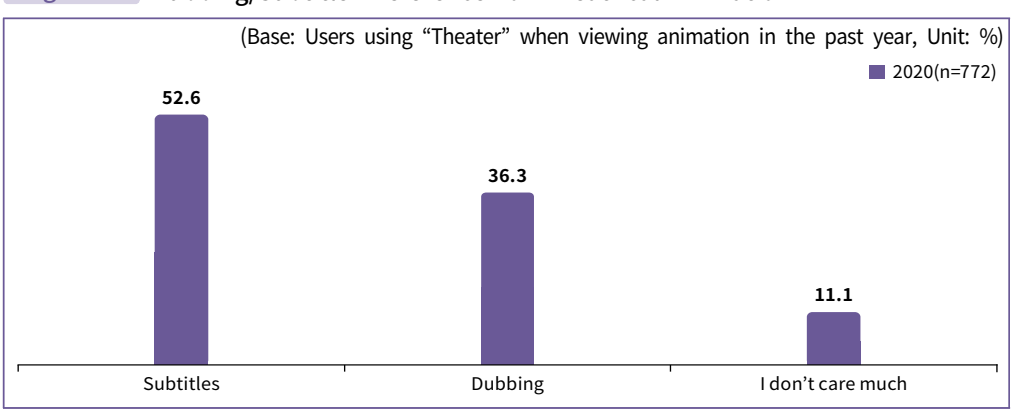

Figure 8 Preferred Viewing Type for Theatrical Animation

10. Dubbing/Subtitle Preference for Theatrical Animation

Regarding the dubbing and subtitles for the theatrical animation, 52.6% preferred "Subtitles," followed by "Dubbing" (36.3%), and "I don't care much" (11.1%). "Women" (54.4%) preferred "Subtitles" more than "Men" (50.7%), and in the "15-19 years old age group" (88.9%), the ratio on the preference for "Subtitles" was relatively high.

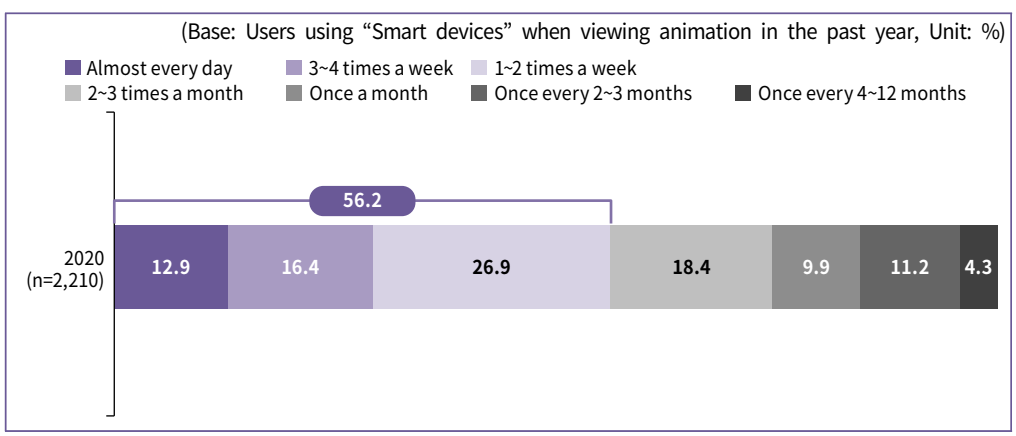

Figure 9 Dubbing/Subtitle Preference for Theatrical Animation

11. Viewing Frequency of Animation on Smart Devices in the Past Year

Based on the viewing frequency of animation on smart devices in the past year, “1-2 times a week” received the highest response rate at 26.9%, followed by “2-3 times a month” (18.4%), “3-4 times a week” (16.4%), and “Almost every day” (12.9%). A slightly higher percentage of “Women” (13.7%) responded that they watched “Almost every day” more than “Men” (12.1%), while in the “3-4 years old age group” (36.2%), a high percentage of respondents said they watched “Almost every day.”

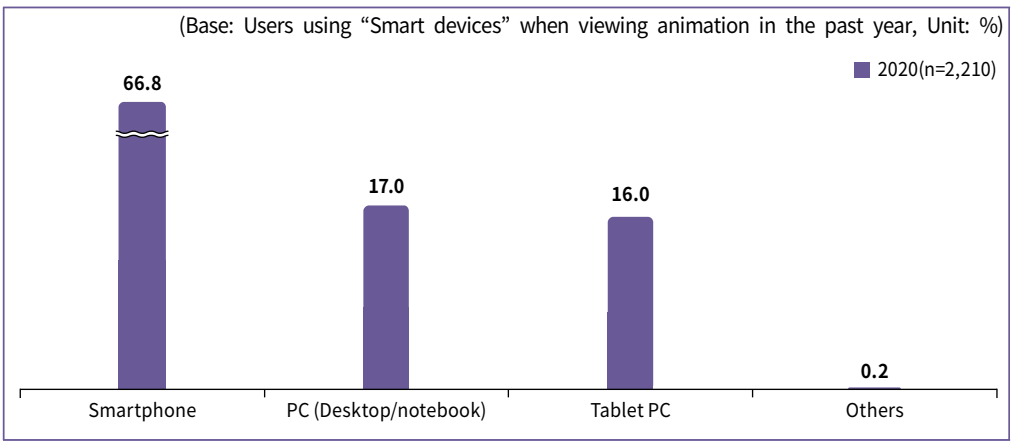

Figure 10 Viewing Frequency of Animation on Smart Devices in the Past Year

12. Smart Device Mainly Used for Viewing Animation

The most frequently used smart devices when watching animation contents were “Smartphone” at 66.8%, followed by “PC (desktop/laptop)” (17.0%), and “Tablet PC” (16.0%). There was no significant difference between genders in the order smart devices preferences, whereas in the “15-19 years old age group” (80.0%), the percentage of using “Smartphone” was relatively high.

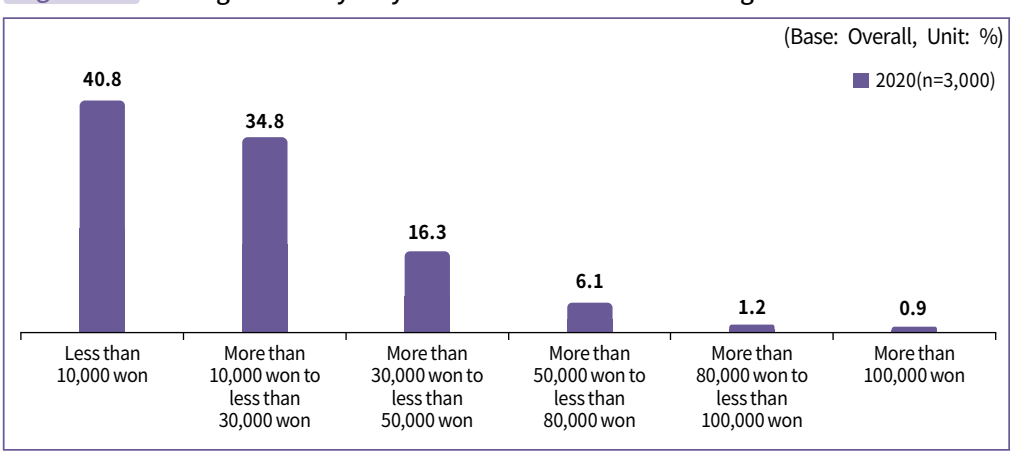

Figure 11 Smart Device Mainly Used for Viewing Animation

13. Payable Amount for Animation Contents

The highest rate for the average monthly payable amount when watching animation was “Less than 10,000 won” at 40.8%, followed by “More than 10,000 won to less than 30,000 won” (34.8%).

Figure 12 Average Monthly Payable Amount When Watching Animation

Part 2 Support Programs for Animation

1. Support Programs for Increasing Production Capability

To strengthen the production capacity of domestic animation creators, the Korea Creative Content Agency implemented support projects for different production stages: from animation planning, initial production, main title production, and completion.

1) Animation Boot Camp

Animation Boot Camp was established to enhance planning and development capabilities, and improve the production rate of the main titles under pre-production stage animation. It has been in operation for three years since its implementation in 2017. In 2019, a bible production mentoring program was added to the existing programs, including pre-pitching mentoring, pre-production planning, and development workshops. Twenty-three companies among the applicant companies were selected, and a mentoring program by coaching producers from major domestic broadcasting companies and investment companies was implemented for three months to strengthen the potential of the project in the planning stage.

2) Support Program for Short Animated Film Production

The Support Program for Short Animated Film Production aims to expand the production base of various animation contents. This project expands the workforce base from production through production support, and promotes the quality of domestic short animation by supporting submissions to international film festivals. Thus, it provides grants for a partial cost for short animation production with artistic value.

3) Support Program for Domestic Animated Film Production

The Support Program for Domestic Animated Film Production aids domestic and foreign investment attractions in projects that have completed the pre-production process to revitalize the production and promotion of global competitiveness. It provides support to produce key trailers for one or two episodes and attract investment in pre-sales once the animation production bible is completed to induce the planning and production of animation content that meets the market demand from the initial stage.

4) Support Program for Level-Up Production

The Support Program for Level-Up Production is geared toward discovering the representative success cases of domestic animation and supporting the completion of the series, which is the final stage of the animation production stage. It has been in operation for four years since 2016. The support targets include projects that have produced more than 50% of the total production target amount as animation in the stable production stage or projects that can be completed within the agreed period.

5) Support Program for Expanded Animated Film Production

The Support Program for Expanded Animated Film Production provides assistance to the production of new concept animation contents with a total length of 5 minutes or more, regardless of platform (TV, theater, mobile device, Internet, performance video, VR, media facade, etc.). This project, which was newly promoted in 2019, aims to foster competent animation contents through the discovery of diverse materials and the actualization of new expression techniques, as well as to expand the consumption class, improve the constitution of domestic companies, and enhance the base of related industries.

6) Support Program for Animated Film for New Media Contents Platform Production

The Support Program for Animated Films and New Media Contents Platform Production will aid in the production and distribution of extended versions (spin-off) of existing TV animation productions on new platforms, such as OTT, YouTube, and the web, or the production and distribution of short animation contents specifically produced for the web and mobile devices. It supports works that were planned and produced with the goal of broadcasting on new media platforms from the beginning and not remain in the simple transformation of existing animation contents (converting/editing, etc.), and aims to increase the number of animation consumers among adolescents and younger people who mainly use new media. Its purpose is also to expand the market base by discovering other materials.

2. Support Programs for Distribution

1) Organization of Local Screening Event of Domestic Animated Films

The Organization of Local Screening Events for Domestic Animated Films presents excellent domestic animation works with different stories and wide imagination to a broader audience. It aims to strengthen the creative ecosystem by increasing interest in locally made long and short animation contents, stimulating regional demand, and making further plans for expansion. In 2019, there were 10 screenings held in many areas, including Muju, Bucheon, Pohang, Gyeongju, Naju, and Jeju.

2) Support Program for Animated Film Submission to International Festivals

The Support Program for Animated Film Submission to International Festivals lays the foundation for international consumption base by endorsing Korean

short animation entries to overseas film festivals, thereby igniting creative drive for domestic creators and raising the global awareness of Korean short animation productions. Its major achievements in 2019 are summarized as follows.

• Current status of the entries to international film festivals
- Group entries: 29 film festivals / 22 times, 86 screenings
- Individual entries: 35 film festivals / 40 screenings at 28 film festivals
- Paid entries: 132 films at 19 film festivals / 26 screenings at 9 film festivals

3) Support Program for International Screening of Animated Films

The Support Program for the International Screening of Animated Films introduces Korean animation to audiences in other countries, expands the Korean Animation Wave, and raises further global awareness. First, applicants were drafted through a public offering, and a preference survey was conducted on overseas diplomatic offices to select the final works. The reproductions of the selected works and video clip kits were distributed to 41 Korean cultural centers and diplomatic offices in other countries. Moreover, an agreement was made with foreign broadcasters (in Nigeria, Rwanda, Panama, and Uganda) to air the animation contents through overseas diplomatic missions so that top-flight domestic animation works could be distributed internationally.

2020
动画产业白皮书

摘　要

第一节 动画产业的用户情况

1. 调查设计

本调查的对象为：在韩国居住的3周岁至59周岁的国民中，最近一年观看过动画内容的人。

以全国固定样本组116万名为抽样框，根据截至2020年7月统计厅居民登记人口统计资料，按各地区、性别、年龄的人口组成比例，按照是否观看过动画内容进行了调查。

调查周期为一年一次，对观看内容调查的回答标准除非另行提及，否则均为2019年8月～2020年8月(最近一年)。资料的收集在2020年8月6~28日，通过网上调查的方式进行。

表 1 2020年动画用户实情调查设计

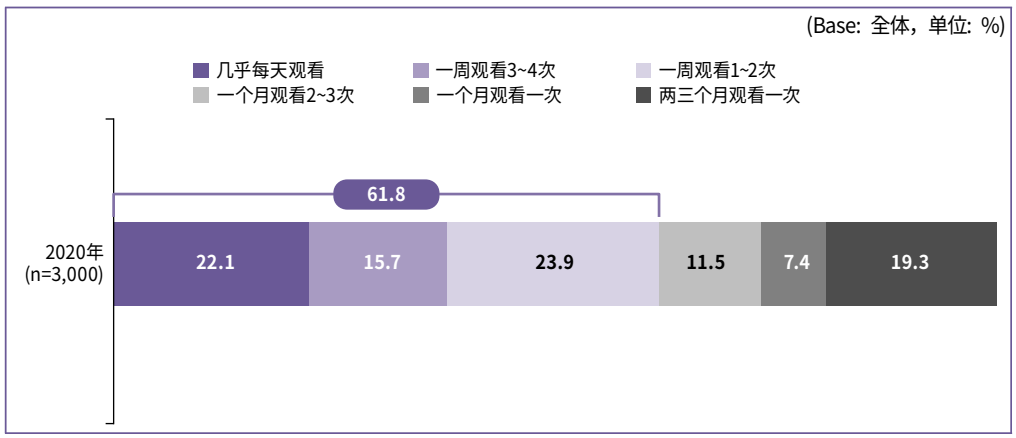

项目	内容
目标总体	3周岁～59周岁的全体国民
调查总体	在3周岁～59周岁的全体国民中，最近一年观看过动画内容的人
调查地区	全国17个市和道
资料收集方法	通过结构化的问卷，在网上进行调查
抽样框	截至2020年7月，行政自治部提供的居民登记人口统计现状 把调查执行机构持有的全国固定样本组116万名作为抽样框
抽样方法	按各地区/性别/年龄比例分配
有效样本	3,000名
样本误差	在95%置信度下为±1.79%p
资料收集时间	2020年8月(2020/8/6~2020/8/28)

2. 最近一年动画内容观看频率

动画观看频率为“一周观看1～2次”的人比例最高，占23.9%。其后，依次为“几乎每天观看(22.1%)”、“两三个月观看一次(19.3%)”、“一周观看3~4次(15.7%)”。在全体调查对象中，有61.8%的人一周观看一次以上动画。

“几乎每天”观看动画的比例为女性(22.9%)高于男性(21.5%)，“3-4岁”年龄段的比例为63.6%，相对较高。

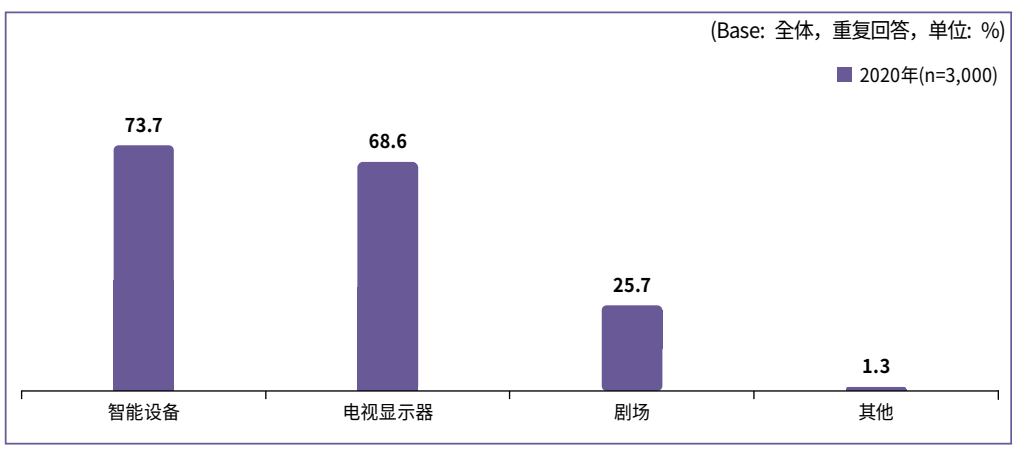

图 1 最近一年动画内容观看频率

3. 最近一年用于观看动画的媒介

从用于观看动画的媒介来看，回答为“智能设备(73.7%)”和“电视显示器(68.6%)”的比例最高。“男性(74.8%)”相比“女性(72.4%)”，使用“智能设备”观看的比例相对更高，“15~19岁(90.9%)”，“25~29岁(89.7%)”年龄段回答为“智能设备”的比例相对较高。

图 2 最近一年用于观看动画的媒介

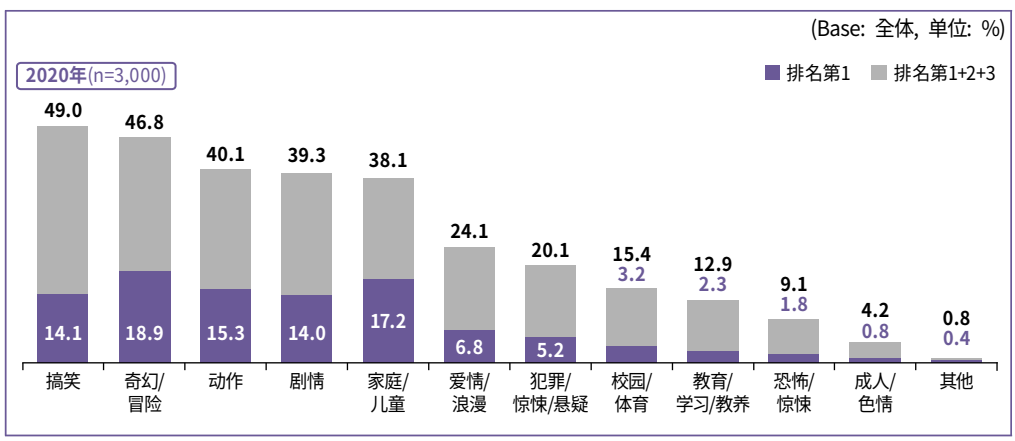

4. 平时爱看的动画类型

动画用户平时爱看的动画类型(以第1+第2+第3为准)中，“搞笑”以49.0%占据首位。其次，回答“SF/奇幻/冒险”的比例为46.8%。

“女性(50.8%)”相比“男性(47.5%)”观看“搞笑”的比例更高，“25~29岁(54.8%)”年龄段更爱看“搞笑”。

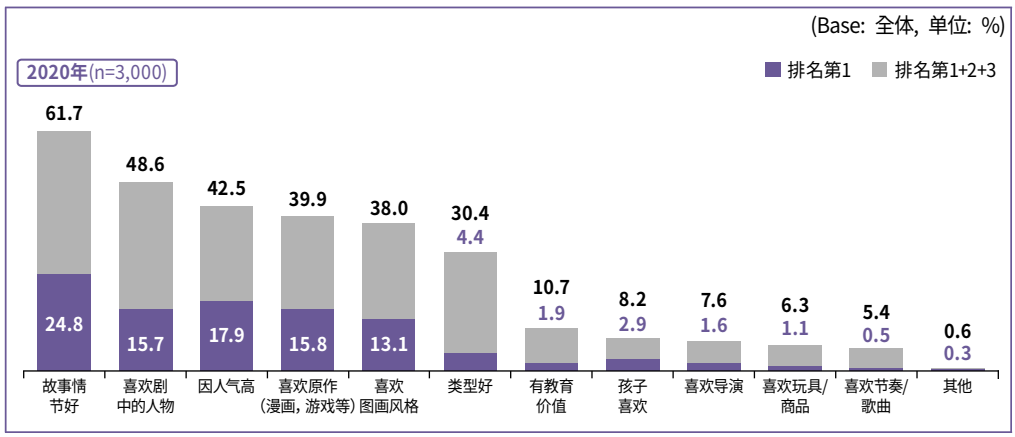

图 3 平时爱看的动画类型

5. 观看动画时的选择理由

动画用户们观看动画时，选择该动画的理由(以第1+第2+第3为准)中，“故事情节好”以61.7%占据首位。其后，依次为“喜欢剧中的人物(48.6%)”、“因人气高(42.5%)”、“喜欢原作(漫画、游戏等)(39.9%)”。“女性(64.0%)”相比“男性(59.7%)”选择“故事情节好”的比例更高。“20~24岁(67.4%)”，“50~59岁(68.2%)”年龄段把“故事情节好”作为选择动画的理由的比例相对较高。

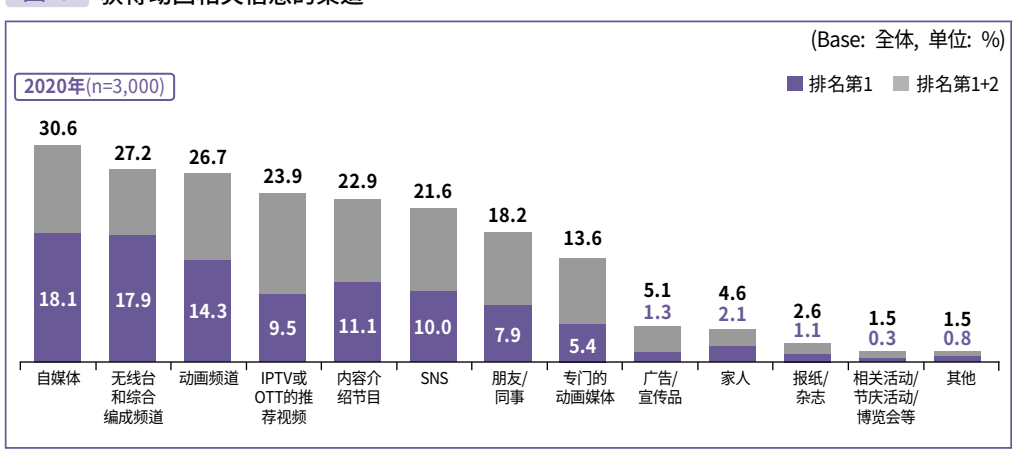

图 4 观看动画时的选择理由

6. 获得动画相关信息的渠道

获得动画相关信息的渠道(以第1+2位为准)中，顺序依次为“自媒体(30.6%)”，“无线台和综合编成频道(27.2%)”，“动画频道(26.7%)”。“男性(33.7%)”相比“女性(27.0%)”更多使用“自媒体”，“3~4岁(48.5%)”年龄段回答“自媒体”的比例也较高。

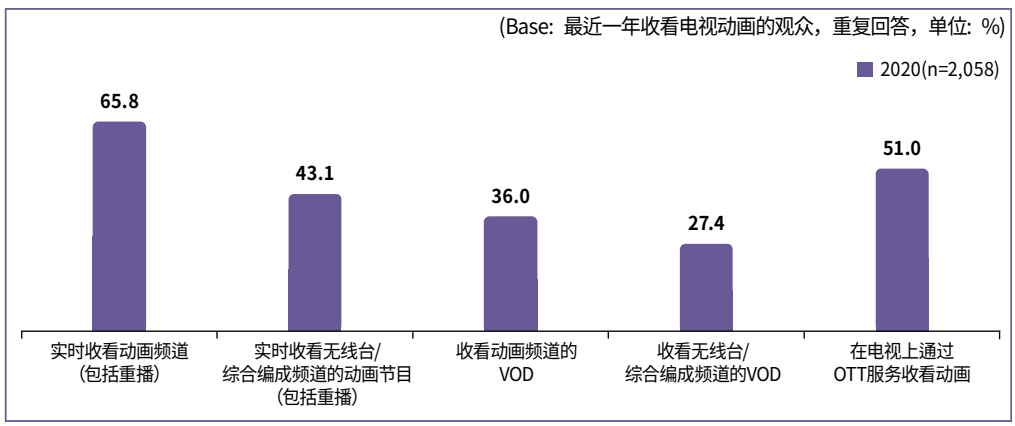

图 5 获得动画相关信息的渠道

7. 收看电视动画的方式

电视动画用户们收看动画的方式中，“实时收看动画频道(包括重播)”以65.8%占据首位。对于收看电视动画的方式的回答，性别没有明显差异。在“5~9岁(77.7%)”和“10~14岁(75.0%)”年龄段中，回答“实时收看动画频道”的比例相对较高。

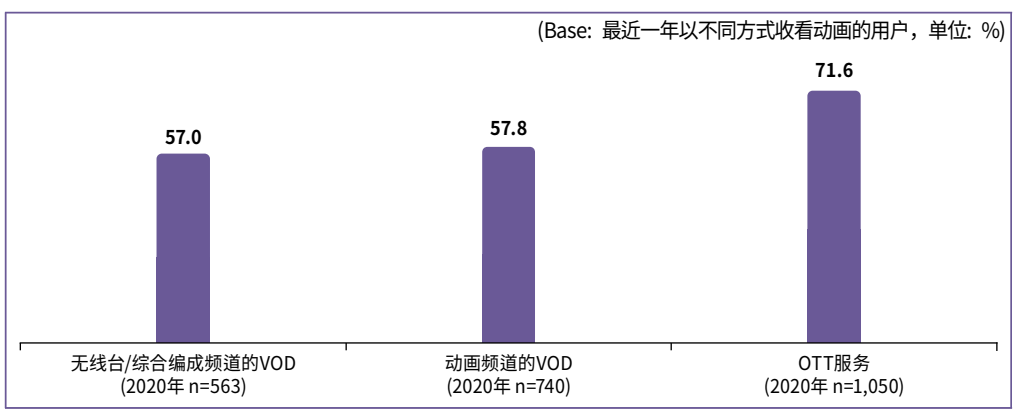

图 6 收看电视动画的方式

8. 收看电视动画的媒体付费体验

收看电视动画的媒体付费体验中，“无线台/综合编成频道的VOD”，“动画频道VOD”，“OTT服务”都有体验的回答比例为57.0%以上，“OTT服务(71.6%)”的付费收看体验相对较高。

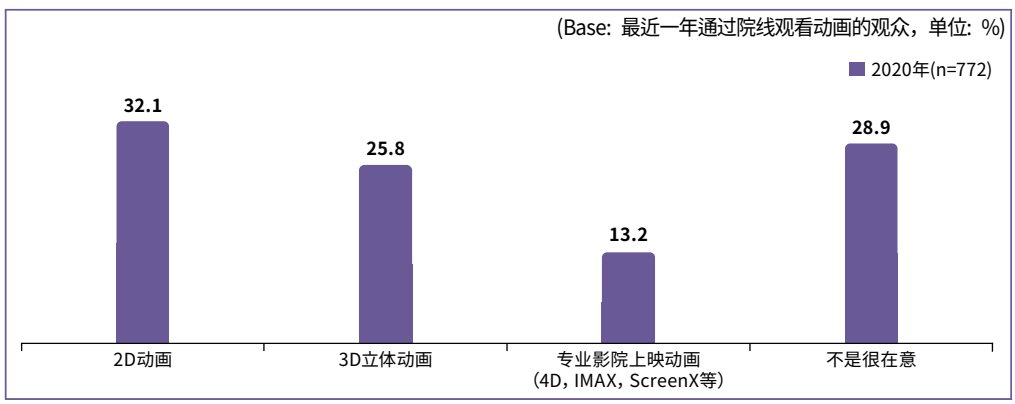

图 7 收看电视动画的媒体付费体验

9. 爱看的院线版动画上映类型

爱看的院线版动画上映类型中，“2D动画”以32.1%占据首位。其后，依次为“不是很在意(28.9%)”，“3D立体动画(25.8%)”，“专业影院上映动画(13.2%)”。

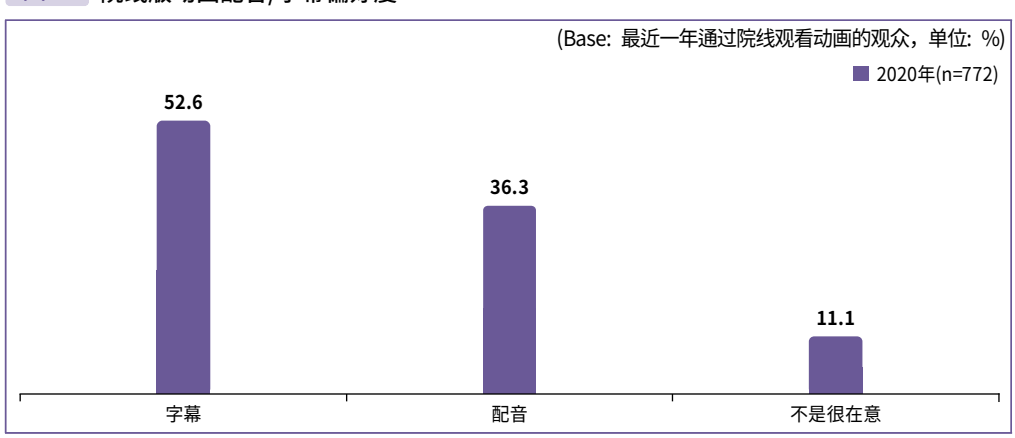

图 8 爱看的院线版动画上映类型

10. 院线版动画配音/字幕偏好

对于院线版动画配音和字幕，偏好“字幕”的比例以52.6%占据首位。其后，依次为“配音(36.3%)”，“不是很在意(11.1%)”。“女性(54.4%)”相比“男性(50.7%)”偏好“字幕”的比例略高，“15~19岁(88.9%)”年龄段偏好“字幕”的比例相对较高。

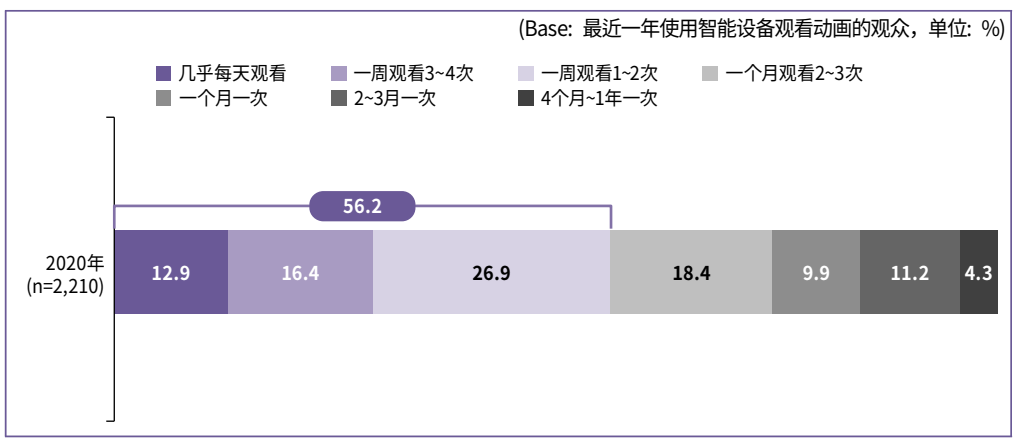

图 9 院线版动画配音/字幕偏好度

11. 最近一年使用智能设备观看动画的频率

最近一年使用智能设备观看动画的频率中，“一周观看1～2次”以26.9%占据首位。其后，依次为“一个月观看2～3次”(18.4%)，“一周观看3～4次”(16.4%)，“几乎每天观看”(12.9%)。“女性(13.7%)”相比“男性(12.1%)”回答“几乎每天观看”的比例略高，“3~4岁(36.2%)”年龄段回答“几乎每天观看”的比例也较高。

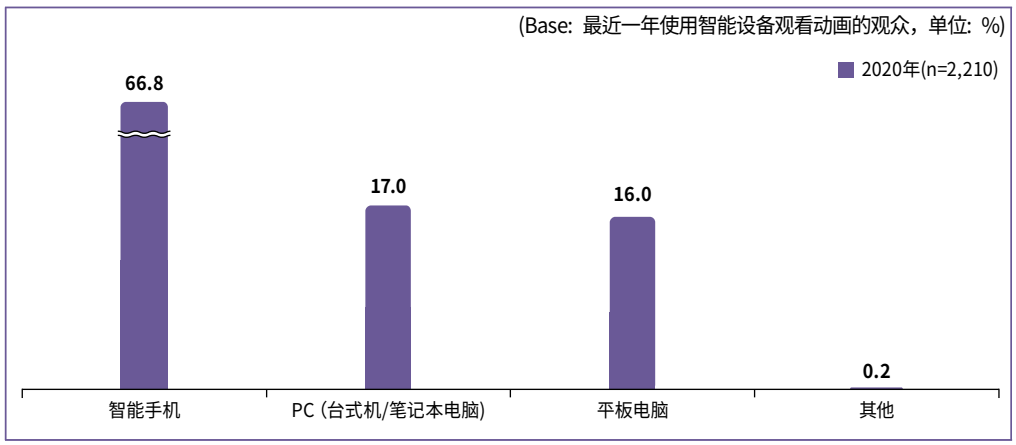

图 10 最近一年使用智能设备观看动画的频率

12. 观看动画时主要使用的智能设备

观看动画时主要使用的智能设备中，“智能手机”以66.8%占据首位。其后，依次为“PC（台式机/笔记本电脑）（17.0%）”和“平板电脑（16.0%）”。对于智能设备偏好顺序的回答，性别没有明显差异。“15~19岁(80.0%)”年龄段使用“智能手机”的比例相对较高。

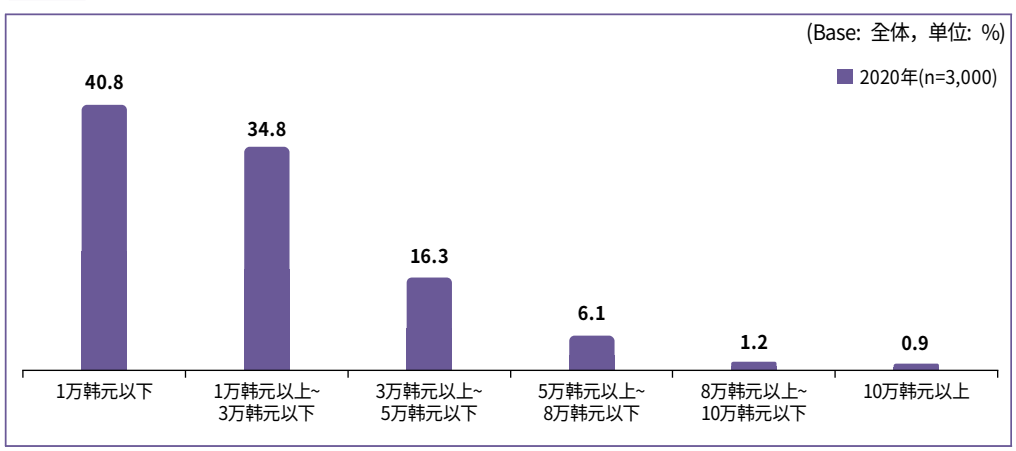

图 11 观看动画时主要使用的智能设备

13. 观看动画时的可消费金额

在观看动画的平均每月可消费金额中，回答为“1万韩元以下”的占据首位，为40.8%。其次为“1万韩元以上~3万韩元以下”。

图 12 观看动画时的月平均可消费金额

第二节 动画资助项目

1. 制作能力强化

韩国文化产业振兴院为了强化韩国国产动画的制作能力，根据动画策划、初期制作、正片制作到完成等制作阶段实施了支持项目。2019年实施的制作支持项目的主要内容如下。

1）动画训练营

动画训练营是以处于前期制作阶段的动画为对象，以增强策划和开发能力以及提高正片制作率为目的成立的。自2017年成立以来，已经运行了三年，并且于2019年在包括前期宣传指导、前期制作策划和开发研讨会等现有项目的基础上增加了使用指南制作指导项目。在申请公司中挑选了23家公司，实施了为期3个月的由韩国国内主要电视台和投资公司组成的指导制片人的辅导方案，旨在加强处于策划阶段的项目的竞争力。

2）短篇动画制作资助

动画短片制作扶持项目旨在扩大各类动画的创作基础。该项目通过对制作的资助来扩大制作的劳动力基础，并通过资助韩国国内动画短片参加国际电影节来向海外宣传韩国动画短片的优秀。为此针对具有艺术价值的动画短片正在提供部分制作费用的资助。

3）韩国国产动画制作资助

韩国国产动画片扶持项目是帮助已完成前期制作阶段项目的国内外招商引资，来促进创作和提高国际竞争力的扶持项目。为了从初期阶段引导符合市场需求的动画策划和制作，在动画制作指南的完成阶段资助吸引售前投资等所需的预告片或1~2集。

4）优秀动画升级制作资助

优秀动画升级资助项目旨在资助被称为动画制作最后阶段的系列动画的完成，来发掘韩国国产动画的代表性成功案例。自2016年以来已经运行了四年。资助对象包括，主片制作后处于制作稳定阶段动画中完成总制作量50%以上的项目，或在协议期内可完成制作的项目。

5）可扩展性动画制作资助

可扩展性动画资助是不分平台（电视、剧院、移动设备、互联网、现场表演视频、虚拟现实、媒体立面等）资助总长度为5分钟以上的新概念动画制作。这一新项目于2019年启动，旨在通过发现各种素材和物化新的表现手法，来发现有竞争力的动画内容，同时也旨在扩大消费阶层，完善韩国国内企业构成和拓展相关产业基础。

6）新媒体内容平台动画制作资助

新媒体内容平台动画制作资助将有助于在如OTT、youtube、网络等新平台上制作和分发现有电视动画的扩展版本（衍生产品），或专门为网络和移动设备制作的动画短片的制作和分发。为了不停留在简单的形式上改造现有动画内容（转换/编辑等），一开始就资助以在新媒体平台上播放为目标策划和制作的作品，旨在增加青少年和年轻人中主要使用新媒体的动画用户数量。其目的也包括发现各种素材来扩大市场基础。

2. 分发资助

1）韩国国产动画地区放映活动

韩国国产动画地区放映活动是一个向观众展示内容丰富多彩，富有想象力的韩国优秀动画作品的项目。通过这一举措，政府希望通过提高对国内长短篇动画的关注，促进本地区需求和规划的扩大，以此来加强创意生态系统。

2）国际电影节参展资助

国际电影节参展资助项目旨在通过资助韩国短篇动画为拓展海外市场奠定基础，从而激发韩国国内创作者的创作热情，提高韩国短篇动画的国际知名度。2019年的主要成就总结如下。

• 国际电影节参赛作品的现状

- 团体参展：29个电影节参展/22集，86部上映
- 个别参展：35个电影节参展/28个电影节40部上映
- 付费参展：19个电影节132部参展/9个电影节26部上映

3）动画国际放映资助

动画国际放映资助项目是将韩国动画引入国外的项目，目的是为了扩大韩流和提高韩国动画的国际知名度。首先，通过公开召集获得申请作品，并对驻外使馆进行偏好调查，选出最终作品。所选作品的复制版本和视频剪辑已分发给41个韩国文化中心和驻外使馆。此外，还与外国广播公司（尼日利亚、卢旺达、巴拿马和乌干达）签署了一项协议，通过驻外使馆播放动画，帮助优秀的韩国动画在国际发行。
